"The early settlers dubbed California The Golden State, and The Land of Milk and Honey. Today there are the obvious ironies -- sprawl, spaghetti junctions and skid row--but the place is not so easily distilled or visualized, either as a clichéd paradise or as its demise. There's a strange kind of harmony when it's all seen together--the sublime, the psychedelic, the self-destructive. Like all places, it's unpredictable and contradictory, but to greater extremes. Cultures and histories coexist, the beautiful sits next to the ugly, the redemptive next to the despairing, and all under a strange and singular light, as transcendent as it is harsh. The pictures in this book begin in the desert east of Los Angeles and move west through the city, ending at the Pacific. This general westward movement alludes to a thirst for water, as well as the original expansion of America, which was born in the East and which hungrily drove itself West until reaching the Pacific, thereby fulfilling its "manifest" destiny." -- Publisher's description

Roberts studied the process by which in the early centuries of our era the roll as the vehicle for literature was replaced by the codex, which has remained the format of the book ever since. New evidence that has accumulated in the last thirty years has set some of the problems in a new light and in this book, published here for the first time in paperback, the authors re-examine these and offer a different explanation for the

remarkable part in the transformation played by the early Church.

Silent reading is now universally accepted as normal; indeed reading aloud to oneself may be interpreted as showing a lack of ability or understanding. Yet reading aloud was usual, indeed unavoidable, throughout antiquity and most of the middle ages. Saenger investigates the origins of the gradual separation of words within a continuous written text and the consequent development of silent reading. He then explores the spread of these practices throughout western Europe, and the eventual domination of silent reading in the late medieval period. A detailed work with substantial notes and appendices for reference.
