SAQs for the Final FRCA is an invaluable guide to the Short Answer Question paper for the Final FRCA examination, providing 9 papers of 12 questions per paper. Each question is accompanied by a full model answer structured using a star system to indicate the essential, desirable and supplementary information. Most answers also carry references and additional notes giving insight into why a question was written or what the examiner was really after. A highly informative FAQ section gives advice on all aspects of exam preparation. The book is laid out to enable the candidate to practise sitting whole papers of 12 questions or to attempt individual questions. Written by a group of authors who have either just successfully taken the Final FRCA or are regularly involved with training anaesthetists via the Frenchay Final FRCA Crammer Course, SAQs for the Final FRCA is an invaluable tool for your exam preparation!

No, Q was not a mere coincidence. Kajal felt a rapid pining for Q to see his work. He urgently needed her to. He was finally ready. Q..That night when I gave her the name, she had no voice or eyes or ears. She wasn't even an animal. She was just an object. A motif that defined a clan. Three individuals resolute minded Doctor, seemingly self-assured relationship-hopper Q and Kajal, an academic failure with growing-up ghosts are thrown into a tryst with circumstances, and layer by layer, they discover themselves more than they unravel each other. As fate leads Kajals life to intertwine with Qs in a way that both find their spaces in the world, Doctor is forced to face brutal realities of his own inadequacies, sending his life spiraling downward into darkness while still seeking the truth. Set in a palpable backdrop of northeast India and London, the non-linear narrative builds minor culminations while rippling to a climax that surprises and leaves a mixed after-taste. Separate Lives weaves the compelling tale of three everyday individuals as their distinct pasts, presents and futures collide, even as chance is the simultaneous protagonist and antagonist.

Eight test papers modelled on the RCR anatomy exam, written by experienced subspecialty radiologists and successful FRCR candidates.

This second edition provides 2400 multiple choice questions on human anatomy and physiology, and some physical science, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in end-of-

semester examinations for undergraduate anatomy and physiology courses and as such reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

"Medical knowledge is not communicable to the natives of this country." With these words, James McAdam, Secretary of the Medical Board of Bombay, sounded the death-knell in 1832 of the pioneering medical school set up in Bombay by Governor Mountstuart Elphinstone. Sir Robert Grant, appointed Governor of Bombay in 1834, disagreed, however. He aimed at 'the general improvement of medical and surgical science and practice among the native practitioners'. With Dr Charles Morehead, he created a medical college superior to those in Calcutta, and Madras. Parsi philanthropist Sir Jamsetjee Jejeebhoy single-handedly donated an entire hospital to complement this college. Graduates from these institutions, trained in scientific medicine of the highest standards, went on to serve their fellow countrymen with distinction. This book narrates how against great odds, Grant Medical College went on to rival medical colleges in Europe and America, and Dr Morehead was invited to help improve medical education at the University of London.

Vol. 6 includes 150th anniversary number.

This book provides two thousand multiple choice questions on human anatomy and physiology, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in examinations for undergraduate introductory courses and as such reflect the focus of these particular courses and are pitched at the level to challenge students that are beginning their training in anatomy and physiology. The questions and answer combinations are to be used both by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition & dietetics, health sciences and students taking an anatomy and physiology course as an elective.

"For nearly 44 years of ministry, Romans 8:19 has always intrigued my spiritual realm of thought. Just to think that all creation is groaning in travail for the manifestation of the Sons of God. Dr. Momah has clearly defined our purpose as born again heirs in the Kingdom of God. Reading this book will equip every believer to execute God's will in the earth." Tommy Bates Senior Pastor Community Family Church Independence, Kentucky Get ready for a wake up call to awaken the slumbering Church that seems content to just pray and hope God gives it to her. Many in the church are more of pleaders than plunderers! The average modern day Christian feels threatened with a financial windfall or elevation in status unaware it is their inheritance not an earned right or an outlandish privilege. Jesus is coming for "...a glorious church, not having spot, or wrinkle, or any such thing; but that it should be holy and without blemish," (Ephesians 5:27). The church cannot be that glorious bride until she shuns the helper toga and settles into being an heir of God.

About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as care fully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo-Berger whose expertise with desk top publishing and perseverance was a great help.
