This book explores various challenging problems and applications areas of wireless sensor networks (WSNs), and identifies the current issues and future research challenges. Discussing the latest developments and advances, it covers all aspects of in WSNs, from architecture to protocols design, and from algorithm development to synchronization issues. As such the book is an essential reference resource for undergraduate and postgraduate students as well as scholars and academics working in the field.

The Government and Politics of France has been the leading textbook on French politics for over a generation, and continues to provide students with a comprehensive and incisive introduction to the intricacies of French politics and government. This edition updates every chapter, with the addition of a new chapter on France and Europe. Recent events necessitate a new edition, particularly the 2002 elections and the growing interpenetration of France and the EU in student programmes, as well as in the real world. Whether covering the shifting balance within France's two-headed executive, the paradoxes of the French party politics, the power and fragmentation of France's administration, the growing assertiveness of French local government, or the newly visible world of the judiciary, The Government and Politics of France has always sought to confront established paradigms with the complex and untidy reality of French politics at the grass roots.

A magisterial history of the artists and writers who left Weimar when the Nazis came to power In 1933 thousands of intellectuals, artists, writers, militants and other opponents of the Nazi regime fled Germany. They were, in the words of Heinrich Mann, "the best of Germany," refusing to remain

citizens in this new state that legalized terror and brutality. Exiled across the world, they continued the fight against Nazism in prose, poetry, painting, architecture, film and theater. Weimar in Exile follows these lives, from the rise of national socialism to their return to a ruined homeland, retracing their stories, struggles, setbacks and rare victories. The dignity in exile of Walter Benjamin, Ernst Bloch, Bertolt Brecht, Alfred Döblin, Hanns Eisler, Heinrich Mann, Thomas Mann, Anna Seghers, Ernst Toller, Stefan Zweig and many others provides a counterpoint to the story of Germany under the Nazis.

French government during the immediate post-war years, and the advisory program that developed after the Geneva Agreements of 1954. Its scope ranges from high-level policy decisions to low-echelon advisory operations in the field, presented against a background of relevant military and political developments. The author enjoyed access to the official records of the period and examined personal papers, interviews, other documentary sources, and miscellaneous published materials. Useful not only as a study of military assistance but as a view of the Army as an agent of national policy, this volume is a fitting introduction to the overall study of the conflict in Vietnam.

The book summarizes the findings and contributions of the European ARTEMIS project, CESAR, for improving and enabling interoperability of methods, tools, and processes to meet the demands in embedded systems development across four domains - avionics, automotive, automation, and rail. The contributions give insight to an improved engineering and safety process life-cycle for the development of safety critical systems. They present new concept of engineering tools integration platform to improve the development of safety critical embedded systems and illustrate capacity of this framework for end-user instantiation to specific domain needs and processes. They also advance state-of-the-art in component-based development as well as component and system validation and verification, with tool support. And finally they describe industry relevant evaluated processes and methods especially designed for the embedded systems sector as well as easy adoptable common interoperability principles for software tool integration.

*The Shadow and Its Shadow* is a classic collection of writings by the Surrealists on their mad love of moviegoing. The forty-odd theoretical, polemical, and poetical re-visions of the seventh art in this anthology document Surrealism's scandalous and nonreductive take on film. Writing between 1918 and 1977, the essayists include such names as André Breton, Louis Aragon, Robert Desnos, Salvador Dalí, Luis Buñuel, and man Ray, as well as many of the less famous though equally fascinating figures of the movement. Paul Hammond's introduction limns the history of Surrealist cinemania, highlighting how these revolutionary poets, artists, and philosophers sifted the silt of commercial-often Hollywood-cinema for the odd fleck of gold, the windfall movie that, somehow slipping past the censor, questioned the dominant order. Such prospecting pivoted around the notion of lyrical behavior-as depicted on the screen and as lived in the movie house. The representation of such behavior led the Surrealists to

valorize the manifest content of such denigrated genres as silent and sound comedy, romantic melodrama, film noir, horror movies. As to lived experience, moviegoing Surrealists looked to the spectacle's latent meaning, reading films as the unwitting providers of redemptive sequences that could be mentally clipped out of their narrative context and inserted into daily life—there, to provoke new adventures. Hammond's book is a reminder of the wealth and range of surrealist writings on the cinema. . . . [T]he work represented here is still challenging and genuinely eccentric, locating itself in an 'ethic' of love, reverie and revolt. --Sight & Sound

Hammond, who is the author of the invaluable anthology *The Shadow and its Shadow: Surrealist Writing on the Cinema* (1978), writes about cinema independently of the changing academic and cultural fashions of film theory and abhors the dogmas of contemporary border-patrol thought. His magnetically appealing free-wheeling form of erudite film-critical writing is recognisable for its iconoclastic humour, non-authoritarian verve and playful witty discursivity. --John Conomos, *Senses of Cinema*

Paul Hammond is a writer, editor, and translator living in Barcelona. He is the author of *Constellations of Miró, Breton* which was published by City Lights.

In the 1970s, an eccentric group of physicists in Berkeley, California, banded together to explore the wilder side of science. Dubbing themselves the "Fundamental Fysics Group," they pursued an audacious, speculative approach to physics,

studying quantum entanglement in terms of Eastern mysticism and psychic mind reading. As David Kaiser reveals, these unlikely heroes spun modern physics in a new direction, forcing mainstream physicists to pay attention to the strange but exciting underpinnings of quantum theory.

Republished for the first time since the 1980s, a legendary book on the cinema from one of the most important figures in the history of film Vivid, eccentric, and free-ranging, this memoir is written in a style reminiscent of the brilliant visual effects of montage and dynamic progression of the legendary Russian director. Eisenstein wittily portrays his life in Russia from the time of the Revolution, his travels in the West, and his encounters with an amazing medley of people on both sides of the Iron Curtain, including Charlie Chaplin, Marlene Dietrich, and Man Ray. With 48 pages of illustrations from the author's own collection, including photos and personal sketches, this is the fullest picture possible of a man and his films, from one of the most iconic eras of the art form.

"Using the example of the aircraft industry, which takes him like an arrow to the heart of many of the key conflicts in French life between 1936 and 1948, Herrick Chapman has written a penetrating and exceptionally well documented account of the way that France developed her present style of industrial relations, in which the state

Paxton, Columbia University "This is a breakthrough of considerable importance. [Chapman] will become the leading North American, perhaps even English-speaking, historian of contemporary France."--George Ross, Brandeis University

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to

deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

"*Rogues in the Gallery*" exposes it all: the cozy insurance ransom racket, the professional gangs of art thieves, the specialists, the connections with the international drug racket and the Mafia. Hugh McLeave has researched the whys and wherefores of the question for years, drawing on resources available to him through agencies such as Interpol, the FBI, the French S ret, and Scotland Yard. "*Rogues in the Gallery*" is a lively and informed account of the causes and limited cures of this epidemic. It charts the classic outbreaks, portrays the rich gallery of protagonists, and defines what means there are to combat the disease. But even with sophisticated computers and Interpol, the total elimination of art theft is unlikely. As long as auction prices continue to rise and inflation devalues savings, the theft of precious objects will flourish. The lure of easy money is at the root. This is a serious book on an urgent problem, especially for those who collect art. For an author bio, photo, and a sample read visit [bosonbooks.com](http://bosonbooks.com) "

communications speed, rapidly broadening access and multiplying storage capacity tend to make systems less secure over time, and security becomes a race against the relentless creativity of the unscrupulous. The revised and extended third edition of this classic reference work on cryptology offers a wealth of new technical and biographical details. The book presupposes only elementary mathematical knowledge. Spiced with exciting, amusing, and sometimes personal accounts from the history of cryptology, it will interest general a broad readership.

Close Up was the first English-language journal of film theory. Published between 1927 and 1933, it billed itself as "the only magazine devoted to film as an art," promising readers "theory and analysis: no gossip." The journal was edited by the writer and filmmaker Kenneth Macpherson, the novelist Winifred Bryher, and the poet H. D., and it attracted contributions from such major figures as Dorothy Richardson, Sergei Eisenstein, and Man Ray. This anthology presents some of the liveliest and most important articles from the publication's short but influential history. The writing in Close Up was theoretically astute, politically incisive, open to emerging ideas from psychoanalysis, passionately committed to "pure cinema," and deeply critical of Hollywood and its European imitators. The articles collected here cover such subjects as women and film, "The Negro in Cinema," Russian and working-class cinema, and developments in film technology, including the much debated addition of sound. The contributors are a cosmopolitan cast, reflecting the journal's commitment to

internationalism; *Close Up* was published from Switzerland, printed in England and France, and distributed in Paris, Berlin, London, New York, and Los Angeles. The editors of this volume present a substantial introduction and commentaries on the articles that set *Close Up* in historical and intellectual context. This is crucial reading for anyone interested in the origins of film theory and the relationship between cinema and modernism.

With politics taking centre stage due to the US presidential election, the time is perfect for a reprint of this classic work from Edward Bernays, the father of public relations and political spin and the man who designed the ad campaign that got the United States involved in World War I. Written in 1928, this was the first book to discuss the manipulation of the masses and democracy by government spin and propaganda.

This book brings together for the first time five recent essays by Jacques Derrida, which advance his reflections on many issues: lying, perjury, forgiveness, confession, the profession of faith, and, most recently, cruelty, sovereignty, and capital punishment. Strongly linked by their attention to "performatives" and the "as if," the essays show the necessity of thinking beyond the category of acts that are possible for a subject. Derrida argues forcefully that thought must engage with the im-possible, that is, the order of the unforeseeable event, the absolute future still to come. This acute awareness of the limits of performative programs informs the essays throughout and attunes them closely to events of a world undergoing "globalization." The first essay, "History of the Lie," reviews some classic and modern definitions of the lie (Augustine, Rousseau, Kant, Koyré, Arendt), while renewing questions about what is called lying, as distinguished from

other forms of nontruth. This inventive analysis is followed by "Typewriter Ribbon," which examines at length the famous lie recounted by Rousseau in his Confessions, when he perjured himself by accusing another of his own crime. Paul de Man's reading of this textual event is at the center of Derrida's patient, at times seriously funny analyses. "Le parjure, Perhaps" engages with a remarkable novel by Henri Thomas that fictionalizes the charge of perjury brought against Paul de Man in the 1950s. Derrida's extraordinary fineness as a reader and thinker of fiction here treats, to profound effect, the "fatal experience of perjury." The two final essays, "The University Without Condition" and "Psychoanalysis Searches the States of Its Soul," address the institutions of the university and of psychoanalysis as sites from which to resist and deconstruct the nontruth or phantasm of sovereignty. For the university, the principle of truth remains at the core of its resistance; for psychoanalysis, there is the obligation to remain true to what may be, Derrida suggests, its specific insight: into psychic cruelty. Resistance to the sovereign cruelty of the death penalty is just one of the stakes indicated by the last essay, which is the text of a keynote address to the "States General of Psychoanalysis" held in Paris, July 2000. Especially for this volume, Derrida has written "Provocation: Forewords," which reflects on the title *Without Alibi* while taking up questions about relations between deconstruction and America. This essay-foreword also responds to the event of this book, which Peggy Kamuf in her introduction presents as event of resistance. *Without Alibi* joins two other books by Derrida that Kamuf has translated for Stanford University Press: *Points . . . : Interviews, 1974-1994* (1994) and *Resistances of Psychoanalysis* (1998). "Let them come forward, they are thirsty for the sight of a King," said Henri IV to his followers who were trying to push back the curious crowds as he entered Paris in February, 1594. It is perhaps to be regretted that seven kings (to say nothing of two emperors) have since more than quenched the French's taste for royalty, because they have long been in need of - and periodically have sought - a symbol of national unity. Modern-day France has had far more than her share of revolutions, counterrevolutions, uprisings, days, coups, affairs, crises, scandals - and constitution drafting. While it would be an over simplification to interpret this endemic strife as a seesaw conflict between two well-integrated blocs with the ideology of the Great Revolution as the dividing issue, the fact remains that since 1789 political divisions and quarrels among Frenchmen have been deep, bitter, and fundamental. After 1870, a Republic may have been the one solution which divided Frenchmen the least (to borrow an expression from Monsieur Thiers) ; but like any and all of the preceding alternatives it was to incur the relentless, irreconcilable opposition of important segments of the population. This study deals with those individuals and organizations which continued to advocate, and sought to bring about a return to the monarchy under the Third and Fourth Republics. In a world where advanced knowledge is widespread and low-cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy-makers should take to create high-quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy: 1) Increase America's talent pool by vastly improving K-12 mathematics and science education; 2) Sustain and strengthen the nation's commitment to long-term basic research; 3) Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad; and 4) Ensure that the United States is the premier place in the world for innovation. Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them.
