Vol. 25 is the report of the commissioner of education for 1880; v. 29, report for 1877.

Gregor Tassie describes Nikolay Myaskovsky as “one of the great enigmas of 20th-century Russian music.” Between the two world wars, the symphonies of Myaskovsky enjoyed great popularity and were performed by all major American and European orchestras; they were some of the most inspiring symphonic works of the last hundred years and prolonged the symphonic genre. But accusations of “formalism” at the 1948 USSR Composers Congress resulted in the purposeful neglect of his music until the collapse of the Soviet Union. Myaskovsky wrote some of the most inspiring symphonic works of the last hundred years and prolonged and extended the symphonic genre. In *Nikolay Myaskovsky: The Conscience of Russian Music*, Tassie gives readers the first modern English-language biography of this Russian composer since his death in 1950. Tassie draws together information from the composer’s diaries and letters, as well as the memoirs of friends and colleagues—even his secret police files—to chronicle Myaskovsky’s early life, subsequent far-reaching influence as a composer, teacher, and journalist, and his final persecution by the Soviet government. This biography will surely rekindle interest in Myaskovsky’s remarkable body of work and will interest aficionados, students, and scholars of the modern classical music tradition and history of the arts in Russia.

In *The Rise of the Bomber: RAF-Army Planning 1919 to Munich 1938*, the second book in the series, author Greg Baughen uses archive material to reassess British air policy in the inter-war years. Gone is the image of a Royal Air Force starved of funds and struggling for survival against a bullying Army and Navy. Instead, Baughen describes how the Air Force set out to replace both the Army and Navy. It blocked the development of a modern air/tank strategy and won government backing for a defence policy built around the bomber the first weapon of mass destruction. Yet the time and money invested in the policy achieved nothing. When put to the test in 1938, the equipment proved inadequate and the strategy flawed. The Air Staff had misled the government, deceived itself and left the country defenceless. Yet, all was not lost. Unintentionally, the Air Ministry had been creating the aircraft that might still save the country...

Following a bloody, violent struggle, in 1971 East Pakistan became the independent state of Bangladesh. Caught in the midst of this conflict were the Biharis, a Muslim minority group who originally fled the Indian state of Bihar when India was partitioned by the British in 1947. Author Azmat Ashraf, himself a Bihari, was one year old when his family escaped India in 1953 for the relative safety of East Pakistan. Less than two decades later, after building a solid life for themselves, his family were targeted by communal violence during Bangladesh’s turbulent birth, in which most of Azmat’s family members were killed. On the road once again, it wasn’t until 2002, nearly fifty years after his first migration, that Azmat finally completed his epic search for a home, settling in Canada with his wife and three daughters. This book is a memoir of one family’s fight for survival and to rebuild their lives following a series of unimaginable tragedies. It is a story of human resilience in the face of evil, of real love and true friendship, and an inspiration for refugees everywhere who are struggling to find a place of security and prosperity in this world. Despite the personal tragedies that Azmat and his family have suffered, he has taken great care to provide a balanced view of the conflict of 1971 to help Pakistanis and Bangladeshis in particular and people of the subcontinent in general understand this painful part of their mutual history. This comprehensive book is useful for Army Cadet College Entrance Exam for the purpose of Study and practice of questions based on the latest pattern of the examination. This book included Comprehensive Study Material with Solved Question-Answers and Model Test Paper (Solved). Detailed Answers have also been provided for the questions for Better Understanding of the Candidates

This book addresses how Western universities have constructed themselves as global providers of education, and are driven to be globally competitive. It examines how the term ‘international’ has been exploited by the market in the form of government educational policies and agencies, host institutions, academia and the mass media. The book explores matters relating to the role of the English language in international education in general and the field of TESOL in particular. It demonstrates how English and TESOL have exercised their symbolic power, coupled with the desire for international education, to create convenient identities for international TESOL students. It also discusses the complexity surrounding and informing these students’ painful yet sophisticated appropriation of and resistance to the convenient labels they are subjected to.

This is an examination and an analysis of the systems of recruitment, selection, education and training for junior officers in the British Armed Forces. It is a study based around four core institutions: The Royal Military Academy, Sandhurst, The Britannia Royal Naval College, Dartmouth, the Department of Initial Officer Training, Royal Air Force College, Cranwell and the Officers Training Wing, Commando Training Centre, Royal Marines, Lympstone. The conclusions reveal the enduring dilemmas involved in the preparation of officer aspirants for entry to the British military profession. For more than 80 years H. P. Lovecraft has inspired writers of horror and supernatural fiction with his dark vision of humankind's insignificant place in a vast, uncaring cosmos. At the time of his death in 1937, Lovecraft was virtually

unknown, but from early cult status his readership expanded exponentially; his nightmarish visions laying down roots in the collective imagination of his readers. Now this master of the macabre is accepted as part of the literary mainstream, as an American author of note, and the impact of his work on modern popular culture - in literature, film, television, music, the graphic arts, gaming and theatre - has been profound. As Stephen King wrote in *Danse Macabre*, the shadow of H. P. Lovecraft 'underlies almost all of the important horror fiction that has come since.' Today, Lovecraft's themes of cosmic indifference, the utter insignificance of humankind, minds invaded by the alien, and the horrors of history remain not only viable motifs for modern speculative fiction, but are more relevant than ever as we explore the mysteries of a universe in which our planet is infinitesimal. This outstanding anthology of original stories - from both established award-winning authors and exciting new voices - collects tales of cosmic horror inspired by Lovecraft from authors who do not merely imitate, but reimagine, re-energize, and renew the best of his concepts in ways relevant to today's readers, to create fresh new fiction that explores our modern fears and nightmares. From the depths of R'lyeh to the heights of the Mountains of Madness, some of today's best weird fiction writers traverse terrain created by Lovecraft and create new eldritch geographies to explore . . . With stories by: Laird Barron, Nadia Bulkin, Amanda Downum, Ruthanna Emrys, Richard Gavin, Lois H. Gresh, Lisa L. Hannett, Brian Hodge, Caitlín R. Kiernan, John Langan, Yoon Ha Lee, Usman T. Malik, Helen Marshall, Silvia Moreno, Norman Partridge, W. H. Pugmire, Veronica Schanoes, Michael Shea, John Shirley, Simon Strantzas, Sandra McDonald, Damien Angelica Walters, Don Webb, Michael Wehunt and A.C. Wise Praise for the editor: 'For fans of Lovecraftian fiction and well-wrought horror' - Library Journal 'Guran smartly selects stories that evoke the spirit of Lovecraft's work without mimicking its style.' - Publishers Weekly 'It's a pretty impressive line-up, with nary a clunker to be found. . . . You don't have to be a Lovecraft fan to enjoy this anthology... You'll find alienation, inhumanity, desperation, cruelty, insanity, hopelessness and despair, all set against the backdrop of a vast, unknowable universe filled with vile, indifferent monstrosities. You'll also find beauty, hope, redemption, and the struggle for survival. What more can you ask for?' - Tor.com 'I highly recommend this collection... If you have even the slightest interest in contemporary horror fiction, you'll want to try this one on for size!' - BookGuide

Since its establishment in 1930 the Irish Military College has had a vital influence on not only the Defence Forces but on the nation. It has formed all of the nation's commissioned officers, many of whom have achieved distinction both within and outside of the Defence Forces. The story of this relatively unknown national institution is intriguing as it has attempted to fulfill the roles laid down for it in 1923 in training and instructing officers and officer candidates. The task has not been easy, as the Military College has inevitably been subject to the many changes and fluctuations in the duties, roles and fortunes of the wider Defence Forces. In this book Colonel Tom Hodson, a former instructor in the Military College and a graduate of *École de Guerre*, Paris, charts its history. He recounts how from its early predecessor, the Army School of Instruction, the Military College has repeatedly re-invented itself, culminating in the requirement for today's modern institution to embrace and impart instruction based on the needs of the Irish Defence Forces and the procedures of European and NATO armies.

This is the first major history of Imperial College London. The book tells the story of a new type of institution that came into being in 1907 with the federation of three older colleges. Imperial College was founded by the state for advanced university-level training in science and technology, and for the promotion of research in support of industry throughout the British Empire. True to its name the college built a wide number of Imperial links and was an outward looking institution from the start. Today, in the post-colonial world, it retains its outward-looking stance, both in its many international research connections, and with staff and students from around the world. Connections to industry and the state remain important. The College is one of Britain's premier research and teaching institutions, including now medicine alongside science and engineering. This book is an in-depth study of Imperial College; it covers both governance and academic activity within the larger context of political, economic and socio-cultural life in twentieth-century Britain."
