

## Discovering Our Past Ancient Civilizations

Graham Hancock's multi-million bestseller *Fingerprints of the Gods* remains an astonishing, deeply controversial, wide-ranging investigation of the mysteries of our past and the evidence for Earth's lost civilization. Twenty years on, Hancock returns with a book filled with completely new, scientific and archaeological evidence, which has only recently come to light... The evidence revealed in this book shows beyond reasonable doubt that an advanced civilization that flourished during the Ice Age was destroyed in the global cataclysms between 12,800 and 11,600 years ago. Near the end of the last Ice Age 12,800 years ago, a giant comet that had entered the solar system from deep space thousands of years earlier, broke into multiple fragments. Some of these struck the Earth causing a global cataclysm on a scale unseen since the extinction of the dinosaurs. At least eight of the fragments hit the North American ice cap, while further fragments hit the northern European ice cap. The impacts, from comet fragments a mile wide approaching at more than 60,000 miles an hour, generated huge amounts of heat which instantly liquidized millions of square kilometres of ice, destabilizing the Earth's crust and causing the global Deluge that is remembered in myths all around the world. A second series of impacts, equally devastating, causing further cataclysmic flooding, occurred 11,600 years ago, the exact date that Plato gives for the destruction and submergence of Atlantis. But there were survivors - known to later cultures by names such as 'the Sages', 'the Magicians', 'the Shining Ones', and 'the Mystery Teachers of Heaven'. They travelled the world in their great ships doing all in their power to keep the spark of civilization burning. They settled at key locations - Gobekli Tepe in Turkey, Baalbek in the Lebanon, Giza in Egypt, ancient Sumer, Mexico, Peru and across the Pacific where a huge pyramid has recently been discovered in Indonesia. Everywhere they went these 'Magicians of the Gods' brought with them the memory of a time when mankind had fallen out of harmony with the universe and paid a heavy price. A memory and a warning to the future... For the comet that wrought such destruction between 12,800 and 11,600 years may not be done with us yet. Astronomers believe that a 20-mile wide 'dark' fragment of the original giant comet remains hidden within its debris stream and threatens the Earth. An astronomical message encoded at Gobekli Tepe, and in the Sphinx and the pyramids of Egypt, warns that the 'Great Return' will occur in our time... This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4)

African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

The evidences from historical record, legends and myths are shouting that it wasn't aliens, that the advanced technologies are echoes of a human society we do not have a written record of. We have the remnants of their buildings, genes, and the sciences that point to a highly advanced human race that survived multiple catastrophes and to this day may live among us. Human bones have been found back millions of years along side the homo erectus and other "primitive" humans. Many revelations of high technology have been being uncovered by independent researchers all over the earth. Anomalies in the historical record, out of place, out of time artifacts are labeled as mysteries or one offs yet show signs of advanced sciences and intelligence. Ancient maps showing lands that were not supposed to have been known, let alone covered deep in ice for thousands of years before human civilization. The case is evaporating of the timeline given for modern man being here for only 3 or 400,000 years. Taking the reader through many fast advances recently in technology and looking at archaeological evidences we build a case for that lost society and technologies. Looking further at rediscoveries of the world of movement, fitness, discoveries in eating and super human abilities and finds in our very genes that without a doubt show us that we have highly advanced ancient relatives. Amazingly illustrated with over 200 photos, this book truly takes you on a journey.

Packed with over 200 colour illustrations, facinating Did You Know? Facts and a glossary for reference, this book provides an informative and inspiring introduction to prehistoric life.

- Updated throughout with recent developments and additional illustrations
- Reveals how solar outbursts caused the end of the last ice age, unleashed catastrophe upon ancient advanced civilizations, and led to six millennia of a Solar-Induced Dark Age
- Includes evidence from solar science, geology, oceanic circulation patterns, the Sphinx, the underground cities of Cappadocia, the Easter Island rongorongo glyphs, and the Göbekli Tepe complex in Turkey

In this newly revised and expanded edition, updated throughout with recent developments, geologist Robert Schoch builds upon his revolutionary theory that

the origins of the Sphinx date back much further than 2500 BCE and examines scientific evidence of the catastrophe that destroyed early high culture nearly 12,000 years ago. Combining evidence from multiple scientific disciplines, Schoch makes the case that the abrupt end of the last ice age, circa 9700 BCE, was due to an agitated Sun. Solar outbursts unleashed electrical/plasma discharges upon Earth, triggering dramatic climate change as well as increased earthquake and volcanic activity, fires, high radiation levels, and massive floods. Schoch explains how these events impacted the civilizations of the time, set humanity back thousands of years, and led to six millennia of a Solar-Induced Dark Age (SIDA). Applying the SIDA framework to ancient history, he explores how many megalithic monuments, petroglyphs, indigenous traditions, and legends fall logically into place, including the underground cities of Cappadocia, the Easter Island rongorongo glyphs, and the Göbekli Tepe complex in Turkey. He also reveals that our Sun is a much more unstable star than previously believed, suggesting that history could repeat itself with a solar outburst powerful enough to devastate modern society. Weaving together a new view of the origins and antiquity of civilization and the dynamics of the planet we live on, Schoch maintains we must heed the megalithic warning of the past and collectively prepare for future events.

A future archeologist finds the remnants of a mysterious ancient people—us—in a wry satire that is “a marvel of imagination and . . . wonderfully illustrated” (The New York Times). It is the year 4022, and the entire ancient country of Usa has been buried under many feet of detritus from a catastrophe that occurred back in 1985. Howard Carson, an amateur archeologist, is crossing the perimeter of an abandoned excavation site when he feels the ground give way beneath him. Suddenly, he finds himself at the bottom of a shaft, which, judging from the DO NOT DISTURB sign hanging from an archaic doorknob, is clearly the entrance to a still-sealed burial chamber. Carson's incredible discoveries, including the remains of two bodies, one laid to rest on a ceremonial bed facing an altar that appeared to be a means of communicating with the Gods and the other lying in a porcelain sarcophagus in the Inner Chamber. These dramatic discoveries give Carson all the clues he needs to piece together the entire civilization—which he gets utterly wrong. The acclaimed author and illustrator of *Castle and Pyramid*, David Macaulay presents a wonderfully tongue-in-cheek satire of both historical presumption and American self-importance.

The Stage of Time will bring you through an adventurous exploration into understanding the secrets of consciousness, ancient history, and the very nature of reality itself. Be prepared to question the world you live in and everything you thought you knew about the universe, human origins, and the lost civilizations of the past. Discover thought-bending evidence from some of the oldest text ever written and learn the reasons why their content eventually became suppressed and hidden from most of society. Conspiracy theories or conspiracy facts, you decide what's real based on the evidence. Once you read *The Stage of Time*, your perspective on reality may never be quite the same way again. This book includes: -Details about the ancient civilizations that once existed around the world and the events which led to their disappearance. -Translations from ancient texts that include: The Atrahasis, Enuma Elish, Sumerian King List, Eridu Genesis, Code of Hammurabi, Emerald Tablets, and more. -The eagle and the serpent, cataclysms during the last ice age, and the influences of the Anunnaki. -Secrets of consciousness, reincarnation, spirituality, and sentient life in the universe. Thinkers at the forefront in alternative theories on history, the origins of civilization, technology,

and consciousness • With contributions by Graham Hancock, Robert Bauval, Mark Booth, Richard Hoagland, Robert Schoch, John Anthony West, and others • Topics range from quantum philosophy and paranormal phenomena to the secret history of NASA, instant polar shifts, and ancient Martian civilizations • Explores where our present time fits into the cycle of human existence A revolution of thought is under way in our world, fostered by decades of research and well-documented evidence by alternative theory pioneers such as Graham Hancock, John Anthony West, Robert Bauval, and Robert Schoch. These provocative, cutting-edge scholars now represent a direct challenge to the academic establishment as the paradigms of science and history shift and their ideas gain acceptance. Representing the latest, often controversial findings in scientific and historical research, this anthology of essays commissioned by Graham Hancock, bestselling author of *Fingerprints of the Gods*, covers the forefront in alternative theories on history, the origins of civilization, technology, and consciousness with topics ranging from quantum philosophy and paranormal phenomena to the ancient use of electromagnetism, the effect of cosmic rays on human evolution, and NASA's cover-up of ancient Martian civilizations. Recognizing that many recent discoveries are actually rediscoveries of lost knowledge from past civilizations, these authors seek to understand where, within the bigger picture of human knowledge, our present time fits into the cycle of human existence.

This is book two of a series of three books. The series takes students on an interdisciplinary cross content journey entitled, *Creating Art Through the Ages*. Each book provides experiences in language arts, social studies, math and art as the students investigate ancient and modern civilizations. "Discovery and Knowledge", explores the ancient Roman civilization, the Middle Ages and Renaissance. Explorers set sail to discover land, treasures, raw materials and knowledge on behalf of their mother country and religion. The development of the printing press enabled the disbursement of knowledge through books. Discovery and the pursuit of knowledge is the underlying theme during this era. In this book, it is reimagined for students with experiences through stories, interactive role-playing activities, and art projects. Incorporate classroom-tested reading strategies that give your students the tools they need to become independent learners with this middle school world history program—the perfect combination of story and standards.

The Epic of Gilgamesh is among the earliest surviving works of literature, with the earliest versions dating from around the Third Dynasty of Ur in early Sumeria (2150-2000 BC). Preserved in Cuneiform, the Epic was retold over the centuries, and the most complete version was discovered in the ruins of the library palace of the seventh century BC Assyrian king, Ashurbanipal. The Epic is most notable as being the obvious source of the biblical story of Noah and the flood. The Epic tells the story of the king of Uruk, Gilgamesh, and his adventures with his erstwhile foe and then friend, Enkidu. Together they journey to the Cedar Mountain to defeat Humbaba, its monstrous guardian, then they kill the Bull of Heaven, which the goddess Ishtar sends to punish Gilgamesh for spurning her advances. As a punishment for these actions, the gods sentence Enkidu to death. Gilgamesh then sets out to avoid his friend's fate and seek the secret to eternal life, a quest in which he is ultimately thwarted. Contains original author's preface and a new overview of the storyline. Contents Author's Preface Overview of the Storyline of the Epic of Gilgamesh The First Tablet: Of the Tyranny of Gilgamesh, and the Creation of Enkidu The Second Tablet: Of the Meeting of Gilgamesh and Enkidu The Third Tablet: The Expedition to the Forest of Cedars against Humbaba The Fourth Tablet: The Arrival at the Gate of the Forest The Fifth Tablet: Of the Fight with Humbaba The Sixth Tablet: Of the Goddess Ishtar, Who Fell In

Love with the Hero after His Exploit against Humbaba The Seventh Tablet: The Death of Enkidu The Eighth Tablet: Of the Mourning of Gilgamesh, and What Came of It The Ninth Tablet: Gilgamesh in Terror of Death Seeks Eternal Life The Tenth Tablet: How Gilgamesh Reached Uta-Napishtim The Eleventh Tablet: The Flood The Twelfth Tablet: Gilgamesh, In Despair, Enquires of the Dead

National Geographic Explorer and TED Prize-winner Dr. Sarah Parcak welcomes you to the exciting new world of space archaeology, a growing field that is sparking extraordinary discoveries from ancient civilizations across the globe. In *Archaeology from Space*, Sarah Parcak shows the evolution, major discoveries, and future potential of the young field of satellite archaeology. From surprise advancements after the declassification of spy photography, to a new map of the mythical Egyptian city of Tanis, she shares her field's biggest discoveries, revealing why space archaeology is not only exciting, but urgently essential to the preservation of the world's ancient treasures. Parcak has worked in twelve countries and four continents, using multispectral and high-resolution satellite imagery to identify thousands of previously unknown settlements, roads, fortresses, palaces, tombs, and even potential pyramids. From there, her stories take us back in time and across borders, into the day-to-day lives of ancient humans whose traits and genes we share. And she shows us that if we heed the lessons of the past, we can shape a vibrant future. Includes Illustrations

Coinage - it is one of the most successful and consistent technologies ever invented. Nothing else we still use in everyday life has a history quite like it. Look around at all the things that would bewilder a Greek, Roman, or Renaissance ancestor; then, dig into your purse or pocket for that one artifact that they would immediately recognize as part of their world. Historian Frank L. Holt takes us on a lively journey through the history of numismatics, the study of coins - one of the oldest and most important contributions to the arts and humanities. For 2600 years, poets, economists, philosophers, historians, and theologians have pondered the mysteries of money. Who invented coins, and why? Does coinage function beyond our control as if it had a mind of its own? How has it changed world history and culture? What does numismatics reveal about our past that could never be discovered from any other source? How has numismatics advanced using modern science? Does it still suffer from racist ideas about physiognomy and phrenology? What does its future hold? The approach taken in this richly illustrated book is as multi-faceted as coined money itself. Coins are integral to our economic, social, political, religious, and cultural history. *When Money Talks: The History of Coins* explores each aspect of coinage, and takes a special interest in how coins have appeared in literature and pop culture, ranging in its analysis from Greek drama and the New Testament to T.V. sitcoms and meme theory.

The acclaimed chronicle of the discovery of the legendary lost civilization of the Maya. Includes the history of the major Maya sites, including Palenque, Uxmal, Chichen Itza, Tuloom, Copan, and more. **NEW YORK TIMES BESTSELLER** • Illustrated with a map and more than 100 images. In 1839, rumors of extraordinary yet baffling stone ruins buried within the unmapped jungles of Central America reached two of the world's most intrepid travelers. Seized by the reports, American diplomat John Lloyd Stephens and British artist Frederick Catherwood—both already celebrated for their adventures in Egypt, the Holy Land, Greece, and Rome—sailed together out of New York Harbor on an expedition into the forbidding rainforests of present-day Honduras, Guatemala, and

Mexico. What they found would upend the West's understanding of human history. In the tradition of *Lost City of Z* and *In the Kingdom of Ice*, former San Francisco Chronicle journalist and Pulitzer Prize finalist William Carlsen reveals the remarkable story of the discovery of the ancient Maya. Enduring disease, war, and the torments of nature and terrain, Stephens and Catherwood meticulously uncovered and documented the remains of an astonishing civilization that had flourished in the Americas at the same time as classic Greece and Rome—and had been its rival in art, architecture, and power. Their masterful book about the experience, written by Stephens and illustrated by Catherwood, became a sensation, hailed by Edgar Allan Poe as “perhaps the most interesting book of travel ever published” and recognized today as the birth of American archaeology. Most important, Stephens and Catherwood were the first to grasp the significance of the Maya remains, understanding that their antiquity and sophistication overturned the West's assumptions about the development of civilization. By the time of the flowering of classical Greece (400 b.c.), the Maya were already constructing pyramids and temples around central plazas. Within a few hundred years the structures took on a monumental scale that required millions of man-hours of labor, and technical and organizational expertise. Over the next millennium, dozens of city-states evolved, each governed by powerful lords, some with populations larger than any city in Europe at the time, and connected by road-like causeways of crushed stone. The Maya developed a cohesive, unified cosmology, an array of common gods, a creation story, and a shared artistic and architectural vision. They created stucco and stone monuments and bas reliefs, sculpting figures and hieroglyphs with refined artistic skill. At their peak, an estimated ten million people occupied the Maya's heartland on the Yucatan Peninsula, a region where only half a million now live. And yet by the time the Spanish reached the “New World,” the Maya had all but disappeared; they would remain a mystery for the next three hundred years. Today, the tables are turned: the Maya are justly famous, if sometimes misunderstood, while Stephens and Catherwood have been nearly forgotten. Based on Carlsen's rigorous research and his own 1,500-mile journey throughout the Yucatan and Central America, *Jungle of Stone* is equally a thrilling adventure narrative and a revelatory work of history that corrects our understanding of Stephens, Catherwood, and the Maya themselves.

Evaluate students' progress with the printed booklet of Chapter Tests and Lesson Quizzes. Preview online test questions or print for paper and pencil tests. Chapter tests include traditional and document-based question tests.

You got into the teaching profession to make a difference. You had some exceptional teachers growing up, and you thought you had what it took to make a similar impact on young people. Yet, from the moment you inherited your first group of students, you have been struggling to keep your head above water. During each period of the day, while you attempt to deliver quality instruction, there are a handful of loud and obnoxious students that make it their mission to disrupt your lessons and cause chaos in the classroom. Because of your inability to take control, others have joined in the insurrection. There is no teacher 911 number to dial, and you feel frustrated and helpless. Your dream job has turned into a fight for survival. As a new instructor, you'll need the knowledge and practical experience to set up your classroom, design and teach lesson plans, and communicate with the parents of your students. Your top priority, however, is to establish classroom management strategies and get students to

buy into your rules and governance. If you can convince them to do so, you'll set the table for a successful school year. Become the leader of your classroom and help students discover the educational opportunities that await!

If you want to spark young people's interest in history, teach them about the undocumented legends they won't find in their traditional history books. This title offers readers a juicy retelling of what some people speculate is an alternate history of the Americas. From Vikings maps of America hundreds of years before Columbus to the discovery of a lost Christian colony in prehistoric Michigan, this book dares to uncover some of history's most controversial legends.

The first official companion book to HISTORY® network's hit series Ancient Aliens®: a powerful journey through human history that explores fascinating unanswered questions about the origins of our civilizations. With a foreword by Series Creator, Kevin Burns. Millions of people around the world believe we have been visited in the past by extraterrestrial beings. What if it were true? And if so, what if there were clues left behind? Each week, hundreds of thousands of viewers tune in to the wildly popular Ancient Aliens® television series to seek insight into those very questions—and to become part of a thrilling, probing exploration of the mysteries at the heart of world civilizations. The first official companion book to the hit show, Ancient Aliens® takes readers even deeper into the mysteries that have made the show a pop culture phenomenon. Filled with exciting insights and behind-the-scenes stories from the show's creators and leading experts in ancient alien theory, the book explores the key questions at the heart of the series: Who were they? Why did they come? What did they leave behind? Where did they go? Will they return? Transporting readers around the globe, Ancient Aliens® explores the fascinating enigmas and mysterious artifacts our ancestors left behind, from incredible objects to amazingly accurate ancient maps; from the Great Pyramid of Giza and stone megaliths at Gobekli Tepe to the Nazca Plains and mysterious structures of Puma Punku. Accompanied by lavish 4-color photography throughout, the book allows armchair archaeologists to examine the evidence up close for the first time. Both the ultimate-fan book and the perfect gift for readers new to the show, Ancient Aliens® is a compelling journey through the mysteries of our ancient civilizations and the possibility of alien influence on our cultures.

“Edifying from every point of view--historical, cultural, and culinary.” —David Tanis, author of *A Platter of Figs and Other Recipes* It's a culinary catalyst, an agent of change, a gastronomic rock star. Ubiquitous in the world's most fabulous cuisines, butter is boss. Here, it finally gets its due. After traveling across three continents to stalk the modern story of butter, award-winning food writer and former pastry chef Elaine Khosrova serves up a story as rich, textured, and culturally relevant as butter itself. From its humble agrarian origins to its present-day artisanal glory, butter has a fascinating story to tell, and Khosrova is the perfect person to tell it. With tales about the ancient butter bogs of Ireland, the pleasure dairies of France, and the sacred butter sculptures of Tibet, Khosrova details butter's role in history, politics, economics, nutrition, and even spirituality and art. Readers will also find the essential collection of core butter recipes, including *beurre manié*, *croissants*, *pâte brisée*, and the only buttercream frosting anyone will ever need, as well as practical how-tos for making various types of butter at home--or shopping for the best. “A fascinating, tasty read . . .

And what a bonus to have a collection of essential classic butter recipes included.”  
—David Tanis, author of *A Platter of Figs and Other Recipes* “Following the path blazed by Margaret Visser in *Much Depends on Dinner*, Elaine Khosrova makes much of butter and the ruminants whose milk man churns. You will revel in dairy physics. And you may never eat margarine again.” —John T. Edge, author of *The Potlikker Papers: A Food History of the Modern South* “Butter proves that close study can reveal rich history, lore, and practical information. All that and charm too.” —Mimi Sheraton, author of *1,000 Foods to Eat Before You Die* “Irresistible and fascinating . . . This is one of those definitive books on a subject that every cook should have.” —Elisabeth Prueitt, co-owner of *Tartine Bakery* “The history of one of the most delectable ingredients throughout our many cultures and geography over time is wonderfully churned and emulsified in Khosrova’s *Butter* . . . Delightful storytelling.” —Elizabeth Falkner, author of *Demolition Desserts: Recipes from Citizen Cake*

Unit 1. Early civilizations -- Unit 2. The ancient world -- Unit 3. New empires and new faiths -- Unit 4. The middle ages -- Unit 5. A changing world -- Unit 6. Modern times.  
*A History of Mobility in New Mexico* uses the often-enigmatic chipped stone assemblages of the Taos Plateau to chart patterns of historical mobility in northern New Mexico. Drawing on evidence of spatial patterning and geochemical analyses of stone tools across archaeological landscapes, the book examines the distinctive mobile modalities of different human communities, documenting evolving logics of mobility—residential, logistical, pastoral, and settler colonial. In particular, it focuses on the diversity of ways that Indigenous peoples have used and moved across the Plateau landscape from deep time into the present. The analysis of Indigenous movement patterns is grounded in critical Indigenous philosophy, which applies core principles within Indigenous thought to the archaeological record in order to challenge conventional understandings of occupation, use, and abandonment. Providing an Indigenizing approach to archaeological research and new evidence for the long-term use of specific landscape features, *A History of Mobility in New Mexico* presents an innovative approach to human-environment interaction for readers and scholars of North American history.

Here is the story of America's oldest - and oddest - civilization, the Olmecs of the southern Mexican jungles. Virtually unknown to archaeologists until the early twentieth century, their true importance is only now being realized and shedding new light on how the Indian peoples of the Americas came to be here.

Incorporating the latest scholarship, this upper-level ancient history text guides students through the process of historical inquiry and exploration. Covering topics ranging from the need for water in ancient societies to the problem of ancient suicide, this narrative presents a balanced, cultural approach within a chronicle of historical events and evidence, thereby promoting critical thinking, sharpening analytical skills, and building student interest. This text offers a unique, multi-part pedagogical framework. Each chapter is organized by "The Problem," "Sources and Method," "The Evidence," "Questions to Consider," and the "Epilogue." Diverse primary source materials include documents, maps, art, city plans, and

statistical data. At the end of each chapter, the central theme, or "problem," is tied to contemporary issues.

This unique book reveals the existence of an advanced civilization where none was known before, presenting an entirely new perspective on the culture and history of Tibet. In his groundbreaking study of an epic period in Tibet few people even knew existed, John Vincent Bellezza details the discovery of an ancient people on the most desolate reaches of the Tibetan plateau, revolutionizing our ideas about who Tibetans really are. While many associate Tibet with Buddhism, it was also once a land of warriors and chariots, whose burials included megalithic arrays and golden masks. This first Tibetan civilization, known as Zhang Zhung, was a cosmopolitan one with links extending across Eurasia, bringing it in line with many of the major cultural innovations of the Late Bronze Age and Iron Age. Based on decades of research, *The Dawn of Tibet* draws on a rich trove of archaeological, textual, and ethnographic materials collected and analyzed by the author. Bellezza describes the vast network of castles, temples, megaliths, necropolises, and rock art established on the highest and now depopulated part of the Tibetan plateau. He relates literary tales of priests and priestesses, horned deities, and the celestial afterlife to the actual archaeological evidence, providing a fascinating perspective on the origins and development of civilization. The story builds to the present by following the colorful culture of the herders of Upper Tibet, an ancient people whose way of life is endangered by modern development. Tracing Bellezza's epic journeys across lands where few Westerners have ventured, this book provides a compelling window into the most inaccessible reaches of Tibet and a civilization that flourished long before Buddhism took root.
