The New Manager's Guide and Mentor The Harvard Business Essentials series is designed to provide comprehensive advice, personal coaching, background information, and guidance on the most relevant topics in business. Whether you are a new manager seeking to expand your skills or a seasoned professional looking to broaden your knowledge base, these solution-oriented books put reliable answers at your fingertips. Decision making is a critical part of management, and bad choices can damage careers and the bottom line. This book offers the tools and advice managers need to avoid common biases and arrive at and implement decisions that are both sound and ethical.

This book focuses on the tactics and strategies used in business-to-business contract negotiations. In addition to outlining general negotiation concepts, techniques and tools, it provides insight into relevant framework conditions, underlying mechanisms and also presents generally occurring terms and problems. Moreover, different negotiating styles are illustrated using an exemplary presentation of negotiation peculiarities in China, the USA and Germany. The presented tactics and strategies combine interdisciplinary psychological and economic knowledge as well as findings from the field of communication science. The application scope of these tactics and strategies covers business-to-business negotiations as well as company-internal negotiations. The fact that this book does not necessarily stipulate any prior knowledge of the subject of negotiations also makes it highly suitable for nonprofessionals with a pronounced interest in negotiations. Nonetheless, it provides proficient negotiators with a deeper understanding for situations experienced in negotiations. This book also helps practitioners to identify underlying mechanisms and on this basis sustainably improve their negotiation skills.

A former international hostage negotiator for the FBI offers a new, field-tested approach to high-stakes negotiations—whether in the boardroom or at home. After a stint policing the rough

streets of Kansas City, Missouri, Chris Voss joined the FBI, where his career as a hostage negotiator brought him face-to-face with a range of criminals, including bank robbers and terrorists. Reaching the pinnacle of his profession, he became the FBI's lead international kidnapping negotiator. *Never Split the Difference* takes you inside the world of high-stakes negotiations and into Voss's head, revealing the skills that helped him and his colleagues succeed where it mattered most: saving lives. In this practical guide, he shares the nine effective principles—counterintuitive tactics and strategies—you too can use to become more persuasive in both your professional and personal life. Life is a series of negotiations you should be prepared for: buying a car, negotiating a salary, buying a home, renegotiating rent, deliberating with your partner. Taking emotional intelligence and intuition to the next level, *Never Split the Difference* gives you the competitive edge in any discussion.

For years, academic thinking on negotiations and auctions has matured in different silos. Negotiation theory focused on deals between two parties, investigating psychological motivations and invoking ideas like 'best alternative to a negotiated agreement.' Auction theory, on the other hand, focused exclusively on situations where multiple bidders were involved and the highest bidder won. Harvard Business School professor Guhan Subramanian specializes in understanding how deals. As he studied deals in the news, observed deals as a participant and invited legendary dealmakers into his classroom, one commonality kept cropping up. Assets most often change hand not in a pure negotiation or a pure auction, but by a mechanism that freely combines elements from both schools of thought. Negotiators are 'fighting on two fronts' across the table, but also on the same side of the table with known, unknown, or possible competitors. In *Negotiauctions*, Subramanian provides a lively tour of both negotiation and auction theory, following those summaries with an in-depth look at his hybrid theory that includes strategies that readers can use in real life situations. Along the way Subramanian employs multiple case studies, from studio negotiations over a new season of the TV show *Frasier* to his own experience purchasing a car. Classroom tested in one of the world's best business schools, *Negotiauctions* is an indispensable how-to guide for anyone involved in the sale of high-value assets.

Winner! - CMI Management Book of the Year 2017 – Practical Manager category Master the art of negotiation and gain the competitive advantage Now revised and updated, the second edition of *The Negotiation Book* will teach you about one of the most important skills in business. We all have to negotiate at some point; whether in the office or at home and good negotiation skills can have a profound effect on our lives – both financially and personally. No other skill will give you a better chance of optimizing your success and your organization's success. Every time you negotiate, you are looking for an increased advantage. This book delivers it, whilst ensuring the other party also comes away feeling good about the deal. Nothing will put you in a stronger position to build capacity, build negotiation strategies and facilitate negotiations through to successful conclusions. *The Negotiation Book*: Explains the importance of planning, dynamics and strategies Will help you understand the psychology, tactics and behaviours of negotiation Teaches you how to conduct successful win-win negotiations Gives you the competitive advantage

We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car, purchase a house, and apply for a job. Your ability to negotiate might even be the most important factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in future negotiations. The book also includes (1) a tool you can use to assess your negotiation style; (2) examples of “decision trees,” which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyzing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6) factors to consider when deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing

the performance of an agreement. These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract's legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: "Life is negotiation!" No one ever stated it better. As a mother with young children and as a company leader, the executive realized that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating through your life as a negotiator.

Geared toward executives and managers, a revised guide explains important concepts in macroeconomics using detailed examples from history and helps break down how the economy really works and what impact it has on the business world. 12,500 first printing.

A member of the world renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. A member of the world-renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. For many years, two approaches to negotiation have prevailed: the "win-win" method exemplified in *Getting to Yes* by Roger Fisher, William Ury, and Bruce Patton; and the hard-bargaining style of Herb Cohen's *You Can Negotiate Anything*. Now award-winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one-size-fits-all strategies that don't match real world realities. *The Art of Negotiation* shows how master negotiators thrive in the face of chaos and uncertainty. They don't trap themselves with rigid plans. Instead they understand negotiation as a process of exploration that demands ongoing learning, adapting, and influencing. Their agility enables them to reach agreement when others would be stalemated. Michael Wheeler illuminates the improvisational nature of negotiation, drawing on his own research and his work with Program on Negotiation colleagues. He explains how the best practices of diplomats such as George J. Mitchell, dealmaker Bruce Wasserstein, and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house, buying a car, or landing a new contract. Wheeler also draws lessons on agility and creativity from fields like jazz, sports, theater, and even military science.
