This catalogue explores the early, vibrant, experimental years that shaped Haring's work. Beginning with the years when, having first enrolled in the school of Visual Arts in New York City, he started a diligent and vigorous studio practice, and began making public and political art on the city streets, joining an art community outside the institutionalised art system. This catalogue includes drawings and sketchbooks, videos, flyers, posters, photographs and subway drawings, as well as word collages, texts, and diaries. It offers an impression of the artist's manifold maturing process and shows Keith Haring as a philosopher and untiring initiator of artistic and political activities, reflecting his collaboration with other artists, his interest in interdisciplinary aesthetic strategies and the pulsating culture of the time.

NEW YORK TIMES BEST SELLER • A grand, devastating portrait of three generations of the Sackler family, famed for their philanthropy, whose fortune was built by Valium and whose reputation was destroyed by OxyContin. From the prize-winning and bestselling author of Say Nothing, as featured in the HBO documentary Crime of the Century. The Sackler name adorns the walls of many storied institutions—Harvard,

the Metropolitan Museum of Art, Oxford, the Louvre. They are one of the richest families in the world, known for their lavish donations to the arts and the sciences. The source of the family fortune was vague, however, until it emerged that the Sacklers were responsible for making and marketing a blockbuster painkiller that was the catalyst for the opioid crisis. *Empire of Pain* begins with the story of three doctor brothers, Raymond, Mortimer and the incalculably energetic Arthur, who weathered the poverty of the Great Depression and appalling anti-Semitism. Working at a barbaric mental institution, Arthur saw a better way and conducted groundbreaking research into drug treatments. He also had a genius for marketing, especially for pharmaceuticals, and bought a small ad firm. Arthur devised the marketing for Valium, and built the first great Sackler fortune. He purchased a drug manufacturer, Purdue Frederick, which would be run by Raymond and Mortimer. The brothers began collecting art, and wives, and grand residences in exotic locales. Their children and grandchildren grew up in luxury. Forty years later, Raymond's son Richard ran the family-owned Purdue. The template Arthur Sackler created to sell Valium—co-opting doctors, influencing the FDA, downplaying the drug's addictiveness—was employed to launch a far more potent product: OxyContin. The drug went on to generate some thirty-five billion dollars in revenue, and to launch a public health crisis in which hundreds of thousands would die. This is the saga of three generations of a single family and the mark they would leave on the world, a tale that moves from the bustling

streets of early twentieth-century Brooklyn to the seaside palaces of Greenwich, Connecticut, and Cap d'Antibes to the corridors of power in Washington, D.C. *Empire of Pain* chronicles the multiple investigations of the Sacklers and their company, and the scorched-earth legal tactics that the family has used to evade accountability. The history of the Sackler dynasty is rife with drama—baroque personal lives; bitter disputes over estates; fistfights in boardrooms; glittering art collections; Machiavellian courtroom maneuvers; and the calculated use of money to burnish reputations and crush the less powerful. *Empire of Pain* is a masterpiece of narrative reporting and writing, exhaustively documented and ferociously compelling. It is a portrait of the excesses of America's second Gilded Age, a study of impunity among the super elite and a relentless investigation of the naked greed and indifference to human suffering that built one of the world's great fortunes.

How can symbols have meaning for a subject?

Foundations of Understanding argues that this is the key question to ask about intentionality, or meaningful thought. It thus offers an alternative to currently popular linguistic models of intentionality, whose inadequacies are examined: the goal should be to explain, not how symbols, mental or otherwise, can refer to or 'mean' states of affairs in the external world, but how they can mean something to us, the users. The essence of intentionality is shown to be conscious understanding, the roots of which lie in experiences of embodiment and goal-directed action. A developmental path is traced from a foundation of conscious understanding in the ability to

perform basic actions, through the understanding of the concept of an objective, external world, to the understanding of language and abstract symbols. The work is interdisciplinary: data from the neurosciences and cognitive psychology, and the perspectives of phenomenologists such as Merleau-Ponty, are combined with traditional philosophical analysis. The book includes a chapter on the nature of conscious qualitative experience and its neural correlates. (Series A)

resources have emerged as major challenges for the environmental legal system. The second edition of Australian Environmental Law addresses these issues. It remains a principles-based text on environmental law and policy which examines Australia's environmental system from a doctrinal and instrumental perspective. Relevant legislation and case law have been updated throughout and the book has been restructured to reflect ever-increasing levels of social, political and academic interest in sustainable development and environmental planning. The chapters on ecologically sustainable development and the instruments of environmental law have been rewritten, restructured and relocated, and a new chapter on the emerging challenges for environmental law has been added, including discussion of climate change and water resources management.

Pax Galactica. Enemies become allies. Old secrets are at last revealed. Long-held beliefs and widely accepted truths are challenged. Man turns to leisurely pursuits. In this golden age, two old friends are drawn together. They seek to understand, and wonder how what they have long believed, what they have been taught, was never so. Over two hundred years ago, the life of one of Starfleet's earliest pioneers came to a tragic end, and Captain Jonathan Archer, the legendary commander of Earth's first warp-five starship, lost a close friend. Or so it seemed for many years. But with the passage of time, and the declassification of certain crucial files, the truth about that fateful day -- the day that Commander Charles "Trip" Tucker III didn't die -- could finally be revealed. Why did Starfleet feel it was necessary to rewrite

Why colleges and universities live or die by free speech

Free speech is under attack at colleges and universities today, as critics on and off campus challenge the value of freewheeling debate. In *Speak Freely*, Keith

Whittington argues that universities must protect and

encourage vigorous free speech because it goes to the heart of their mission to foster freedom of thought,

ideological diversity, and tolerance. Examining hot-button

issues such as trigger warnings, safe spaces, hate speech, disruptive protests, speaker disinvitations, and the use of social media by faculty, *Speak Freely* describes the dangers of empowering campus censors to limit speech and enforce orthodoxy. It explains why universities must make space for voices from both the Left and Right. And it points out how better understanding why the university lives or dies by free speech can help guide students, faculty, administrators, and alumni when faced with unpopular, hateful, or dangerous speech. Timely and vitally important, *Speak Freely* shows why universities can succeed only by fostering more free speech, more free thought—and a greater tolerance for both.

This book describes the construction and the properties of CW-complexes. These spaces are important because firstly they are the correct framework for homotopy theory, and secondly most spaces that arise in pure mathematics are of this type. The authors discuss the foundations and also developments, for example, the theory of finite CW-complexes, CW-complexes in relation to the theory of fibrations, and Milnor's work on spaces of the type of CW-complexes. They establish very clearly the relationship between CW-complexes and the theory of simplicial complexes, which is developed in great detail. Exercises are provided throughout the book; some are straightforward, others extend the text in a non-trivial way. For the latter; further reference is given for their solution. Each chapter ends with a section sketching the historical development. An appendix gives basic results from topology, homology and homotopy theory. These

features will aid graduate students, who can use the work as a course text. As a contemporary reference work it will be essential reading for the more specialized workers in algebraic topology and homotopy theory. More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.

Grammar for Great Writing is a three-book series that focuses on the key grammatical and lexical elements learners need to become more powerful academic writers. From a leading philosopher of the mind comes this lucid, provocative argument that offers a radically new picture of human consciousness—panpsychism. Understanding

Online Library Great Writing Foundations By Keith S Folse

how brains produce consciousness is one of the great scientific challenges of our age. Some philosophers argue that consciousness is something "extra," beyond the physical workings of the brain. Others think that if we persist in our standard scientific methods, our questions about consciousness will eventually be answered. And some even suggest that the mystery is so deep, it will never be solved. Decades have been spent trying to explain consciousness from within our current scientific paradigm, but little progress has been made. Now, Philip Goff offers an exciting alternative that could pave the way forward. Rooted in an analysis of the philosophical underpinnings of modern science and based on the early twentieth-century work of Arthur Eddington and Bertrand Russell, Goff makes the case for panpsychism, a theory which posits that consciousness is not confined to biological entities but is a fundamental feature of all physical matter—from subatomic particles to the human brain. In *Galileo's Error*, he has provided the first step on a new path to the final theory of human consciousness. Takes a step-by-step approach that centers on the essential processes and organizational strategies of teaching students how to effectively transition from paragraphs to essays.

scholars and contemporary authors, as well as up-to-date translations by award-winning translators. The Second Edition of *Great Sentences for Great Paragraphs* teaches beginning- and low-intermediate-level students the grammar needed for accurate sentence construction and the basics of paragraph development. The text uses sample paragraphs to provide students with authentic input regarding English composition, paragraph organization, and cohesion. In addition, contextualized grammar activities, suggestions for additional writing practice, journal-writing assignments, and an emphasis on peer editing all work together to help students develop academic writing skills. The *Word Building* feature offers practice with common suffixes and helps students develop a rich vocabulary. *Building Better Sentences* encourages students to practice constructing and combining sentences—the cornerstones of good paragraph writing. Many guided writing activities are supported by additional online material and provide independent practice of targeted structures. Activities with additional web-based content are indicated by icons in the text. Quizzes on the instructor web site help you assess student progress. For fans of *Black Mirror* and *True Detective*, a visceral, high-concept thriller about a psychologist who must protect the life of an eleven-year-old girl whose ability to remember past lives makes them both targets of a ruthless assassin. Dr. Matilda Deacon is a psychologist researching how memories are made and stored when she meets a strange eleven-year-old girl named Ashanique. The girl claims to harbor the memories of the

last soldier killed in World War I and Matilda is skeptical. But when Ashanique starts talking about being chased by the Night Doctors—a term also used by an unstable patient who was later found dead—Matilda can't deny that the girl might be telling the truth. Matilda soon learns that Ashanique and her mother have been on the run their whole lives from a monstrous assassin named Rade. Rade is seeking a certain component ingrained solely in memories, and has left a bloody trail throughout the world. Matilda realizes that Ashanique is in unimaginable danger and that her unique ability comes with a deadly price. "A taut, riveting thriller, a perfect balance of scientific speculation and storytelling" (James Rollins, New York Times bestselling author), *The Clarity* is a compelling take on the possibilities of reincarnation and life after death.
