Happy Retirement Guest Book for guests to share their well wishes, and memories.

Has retirement failed to bring the joy you expected? If so, you're not alone. Approximately 10,000 baby boomers retire daily, and most have trouble adjusting to retirement because they were unprepared for the loss of identity and purpose their job offered. Once retired, they may feel unfulfilled and suffer from PMS (Post-Work Melancholy Syndrome). Dr. James Bash understands this situation. After retiring, he felt disappointed and drained. He scoured the current literature for a cure, but found nothing that would fully revitalize him. He decided to write his own book and began exploring what makes retirement satisfying-why for some these are the fabled golden years. Now he shares what he learned through his research, personal experience, and the advice of his many retired patients. In Prescription for a Happy Retirement, Dr. Bash teaches readers how to:

- Analyze the causes of their Post-Work Melancholy Syndrome
- Plan for retirement if they're still working
- Understand the difference between what they want and what they need in retirement
- Increase their self-esteem by building an identity independent of their work persona
- Create a new social life, routines, and sense of meaning for their days
- Engage in lifelong activities and learning
- Care for themselves physically so retirement is long-lasting and enjoyable

When you retire, it can feel like your spark has been extinguished, which can lead to sadness. With Dr. Bash's prescription, you'll reignite your spark and help light up the world.

major life transition; but if you spend the time designing a future filled with promise and possibilities, the prospect can be utterly exciting and revitalizing. In *Retirement by Design*, professional mentor and coach Ida Abbott shows you how the innovative business principles behind design thinking can be applied to plan a rich, fulfilling, and more meaningful retirement. Her guided workbook uses a business-like approach to leaving business, making your switch much smoother and less jolting. Whether you're considering a new place to settle down, working through financial planning, strategizing how to unwind a business, or deciding on which organizations you want to stay engaged with, making critical decisions takes a lot of organization, thought, and planning. Abbott shows how the five principles of design thinking will revolutionize your retirement-planning process: Empathy: Get inside the shoes of your future self. What will be important to that version of you? Define: Hone in on what is and will be most critical for you to focus on (whether it's volunteering, family, activities, or skills). Ideate: Draw, scribble, brainstorm, and throw around as many different retirement scenarios as you can come up with. Prototype: If retiring across the country in Arizona sounds perfect—try it out first. Come up with opportunities to test out your scenarios with short trips and trial time off. Test: This is the fun part—get back to the drawing board and try more retirement scenarios (and future versions of yourself) before sitting down to make those life-changing decisions. The new and innovative, self-coaching approach of *Retirement by Design* helps you spearhead and navigate a major next step in life. Whether your retirement is 10 years away or swiftly approaching, this workbook ensures you will create a future that is perfectly tailored to you.
