Identifying and describing more Than 750 works published since its precursor was completed in 1995, This book provides a comprehensive record of the current literature about distance and open learning in post-secondary education programs. The authors cover all types of materials from around the world, ranging from brief news items to major research reports and dissertations. Special emphasis is given to Web-based distance education.

This volume represents the papers reviewed and accepted for the HOIT2007 conference held at the Indian Institute of Technology Madras in the city of Chennai, India in August 2007. This volume addresses many of the major themes of current interest in the field, with a particular focus on community-based technologies. This comprehensive book is divided into five different sections reflecting the most up-to-date research on computers and society.

Education has become the number one demanded commodity for social and economic transformation for both developing and developed economies. Thus the number of persons going and returning to school has become too big to be handled by existing brick and mortar learning institutions. Besides, the majority of lifelong learners do not have the time to become full-time students. Distance education is becoming the solution to the aforementioned challenges. It has been defined as the mode of study where the learner is separated in time and space from the institution and tutors providing the tuition.

In the Indian context.

The evolution of distance education in India in forms of dual mode, single mode and consortia has been phenomenal. The system today is one of the largest distance education networks in the world comprising dual mode university distance education institutes, single mode open universities, dual mode secondary education, single mode open schools, distance education council/consortium, and many private and semi-government providers of education and training. The four generations of distance education have been implemented in a variety of forms and models, and the system exhibits adoption of innovative practices in course design, development, delivery, evaluation, media networking, and planning and management which have proved effective in addressing the issues of access and equity, economy, quality and reform in the country, and which have been adapted/emulated by a host of such systems in the developing world. It is, therefore, imperative at this stage to reflect on the developments of above four decades of distance education in this country, and map its future expansion. Each chapter in the volume reflects on the concerned theme covering the distance education system in the country, traces the limitations and adoption of innovative strategies to address the issues, and introspect on its future possibilities.

This directory is the first ever compilation of bibliographic data of research in English language education (ELE) from over 80 universities of India in the last 30 years. It covers particularly the theses and dissertations in ELE in Indian universities. The data consists of over a thousand entries, which can be searched in various ways - by keywords, levels of learners, geographical areas, universities or authors. In most cases, links are also provided to locate particular works in the libraries of respective universities. The book will be useful to those interested in studying the developments in English language education in India and those who wish to undertake research in ELE themselves.

Chapters cover the history of librarianship, national libraries, academic libraries, public libraries, school libraries, and special libraries, as well as the state of bibliographic control and services, library education, and professional organizations in India.

Comprehensive work on Dr. B.R. Ambedkar Open University.

This book provides a comprehensive overview of the organizational models of distance and online learning from an international perspective and from the point of view of economic planning, costing and management decision-making. The book points to directions for the further research and development in this area, and will promote further understanding and critical reflection on the part of administrators, practitioners and researchers of distance education. The experiences and perspectives in distance education in the US are balanced with those in other areas of the world.

This volume provides examples of current developments on the role of ICT for education, development, and social justice within an international context. Chapters draw on advanced contemporary thinking from scholars and practitioners in the field to present case studies of how ICT can be used to promote sustainable development and social justice. Social justice is understood in a wide sense as the pursuit of democracy, justice and development in the struggle against any form of oppression; it is within this context that ICT is explored as a tool for social change. The objectives of this book are: - To analyze the philosophical, historical, political, and cultural backgrounds and contexts that are constitutive of contemporary challenges and tensions in the role of ICT for education, development, and social justice around the world; - To appreciate the contextual and international dimensions of the tensions and challenges faced by educators around the world and contribute to ongoing efforts to sketch a vision for addressing their needs; - To explore ways in which ICT in education can promote social justice and contribute toward sustaining communities around the world

Contributed articles with reference to India.

The major purpose of the workshop, "Setting a Global Agenda for the Nineties," was to identify an agenda for International Council for Distance Education (ICDE)-sponsored research. Three papers that were prepared for the workshop make up the major part of this report: (1) "Marrow Bone Thinking: Toward a Fair Representation of Qualitative Research in Distance Education" (Elizabeth J. Burge); (2) "Concepts of Experimental Inquiry in Distance Education: 'A Systems Perspective'" (Dan O Coldeway); and (3) "On European Distance-Education Research" (Borje Holmberg). It is noted in the preface that outcomes of this workshop include an agenda of eight projects and the development of the Distance Education Online Symposium (DEOS), which allows researchers to communicate with colleagues worldwide using BITNET, INTERNET, EARN, and other internationally accessible computer conference networks. Three appendixes contain the agenda of the workshop program, research questions arising from the workshop, and a list of the names and addresses of the workshop participants. Each paper includes an extensive bibliography. (ALF)

The Would Over Quality Assurance Is An Evolving Mechanism. This Book Is An Attempt To Record Those Developments.

Distance education is arguably one of the major developments in education during the 20th Century. This title explores the array of distance education theories and practices as they have been shaped by the late-20th Century and then positions these in terms of the contemporary circumstances of the 21st Century.

The era of globalization allows for more connectivity between nations and cultures. This increase in international association gives citizens more availability to take advantage of opportunities in other nations, such as medical assistance and accompanying services. Current Issues and Emerging Trends in Medical Tourism focuses on the emerging phenomena of international travel by patients in search of improved healthcare services and treatment, wellness programs, and complementary recreational activities. Including extensive coverage and case studies focusing on patient mobility and new opportunities for health services across borders, this authoritative reference source is essential to the needs of healthcare providers, nonprofit organizations, students, and medical professionals seeking relevant research on the relationship between global travel and access to healthcare. This publication features innovative, research-based chapters spanning the spectrum of medical travel issues including, but not limited to, customer perceptions, ethical considerations, reproductive medicine, social media use, family caregivers, organ transplants, human trafficking, and surrogacy concerns.

Contents: The Problem and its Significance, Review of Related Literature, Method of Investigation, Analysis and Interpretation of Data, Discussion and Suggestions, Summary of Research.
