

Nova

Years after Ed Chianese's fateful trip into the Kefahuchi Tract, the tract has begun to expand and change in ways we never could have predicted—and, even more terrifying, parts of it have actually begun to fall to Earth, transforming the landscapes they encounter. Not far from Moneytown, in a neighborhood of underground clubs, body-modification chop shops, adolescent contract killers, and sexy streetwalking Monas, you'll find the Saudade Event Site: a zone of strange geography, twisted physics, and frightening psychic onslaughts—not to mention the black and white cats that come pouring out at irregular intervals. Vic Serotonin is a “travel agent” into and out of Saudade. His latest client is a woman who's nearly as unpredictable as the site itself—and maybe just as dangerous. She wants a tour just as a troubling new class of biological artifacts are leaving the site—living algorithms that are transforming the world outside in inexplicable and unsettling ways. Shadowed by a metaphysically inclined detective determined to shut his illegal operation down, Vic must make sense of a universe rapidly veering toward a virulent and viral form of chaos...and a humanity almost lost.

Bossa nova is one of the most popular musical genres in the world. Songs such as “The Girl from Ipanema” (the fifth most frequently played song in the world), “The Waters of March,” and “Desafinado” are known around the world. Bossa Nova—a number-one bestseller when originally published in Brazil as *Chega de Saudade*—is a definitive history of this seductive music. Based on extensive interviews with Antonio Carlos Jobim, Jo+o Gilberto, and all the major musicians and their friends, Bossa Nova explains how a handful of Rio de Janeiro teenagers changed the face of popular culture around the world. Now, in this outstanding translation, the full flavor of Ruy Castro's wisecracking, chatty Portuguese comes through in a feast of detail. Along the way he introduces a cast of unforgettable characters who turned Gilberto's singular vision into the sound of a generation.

In the motets of Philippe de Vitry, Guillaume de Machaut, and their contemporaries, tenors have often been characterized as the primary shaping forces, prior in conception as well as in construction to the upper voices. Tenors are shaped by the interaction of *talea* and *color*, medieval terms now used to refer to the independent repetition of rhythms and pitches, respectively. The presence in the upper voices of the periodically repeating rhythmic patterns, often referred to as "isorhythm," has been characterized as an amplification of tenor structure. But a fresh look at the medieval treatises suggests a revised analytical vocabulary: for many fourteenth- and fifteenth-century writers, both *color* and *talea* involved rhythmic repetition, the latter in the upper voices specifically. And attention to upper-voice *taleae* independently of tenor structures brings renewed emphasis to the significant portion of the repertory in which upper voices evince formal schemes that differ from those in the tenors. These structures in turn suggest a revision of the presumed compositional process for motets, implying that in some cases upper-voice text and forms may have preceded the selection and organization of tenors. Such revisions have implications for hermeneutic endeavors, since not only the forms of motet voices but the meanings of their texts change, depending on whether analysis proceeds from the tenor up, or from the top down. Where the presumed compositional and structural primacy afforded to tenors has encouraged a strand of interpretation that reads the upper-voice poetry as conforming to, and amplifying, the tenor text snippets and their liturgical contexts, a "bottom-down" view casts tenors in a supporting role and reveals the poetic impulse of the upper voices as the organizing principle of motets.

Welcome to the Trout and Truffles--the most delightful inn you'll find in the land of Humus. It's proudly owned and operated by the Jeffords family. But there is more than hospitality at the inn these days...something dark is stirring and young Jefferey is about to find out that being the ordinary son of an ordinary innkeeper can take an extraordinary turn of events! When his father disappears while on a quest, Jefferey Jeffords sets out to find him. His search takes an unexpected turn when he meets Thaniel, a priest in hiding with a tale of a holy armor, mysterious

coins, a returning king and a gathering evil that could mean the end of all that they know...

Magnus Cromwell kills for a living. He's organized, professional, efficient. Like a machine. But when his family's life is on the line, that's something else. That calls for the kind of warm-blooded vengeance that scorches earth and summons tungsten rods from space, leaving a whole lot of melted flesh and no one to tell the tale. It should've been a blue milk run. As by-the-book as it gets. With his sister Nina out safe and the opposition decimated by hypersonic gunfire, Magnus wonders where they got the guts to even try. Then something hits him. Lays him out cold, and leaves him waking up to a fantasyland with nothing but his armor and a half-written note to guide him. It's a strange place where even stranger predators eye him for their next meal. Where his life's on a timer, and where the darkest horrors haunt his dreams, painting visions of death. There's no right day to mess with Magnus Cromwell. But the universe sure managed to pick the absolute worst one. Experience the start of a kickass LitRPG Saga from debut author Vowron Prime.

From the #1 New York Times bestselling author of the Ella and Micha series comes a powerful story of love, healing, and impossible choices . . . **BREAKING NOVA** Nova Reed used to have dreams-of becoming a famous drummer, of marrying her true love. But all of that was taken away in an instant. Now she's getting by as best she can, though sometimes that means doing things the old Nova would never do. Things that are slowly eating away at her spirit. Every day blends into the next . . . until she meets Quinton Carter. His intense, honey brown eyes instantly draw her in, and he looks just about as broken as she feels inside. Quinton once got a second chance at life-but he doesn't want it. The tattoos on his arm are a constant reminder of what he's done, what he's lost. He's sworn to never allow happiness into his life . . . but then beautiful, sweet Nova makes him smile. He knows he's too damaged to get close to her, yet she's the only one who can make him feel alive again. Quinton will have to decide: does he deserve to start over? Or should he pay for his past forever?

Chloe's older sister, Ruby, is the girl everyone looks to and longs for, who can't be captured or caged. When a night with Ruby's friends goes horribly wrong and Chloe discovers the dead body of her classmate London Hayes left floating in the reservoir, Chloe is sent away from town and away from Ruby. But Ruby will do anything to get her sister back, and when Chloe returns to town two years later, deadly surprises await. As Chloe flirts with the truth that Ruby has hidden deeply away, the fragile line between life and death is redrawn by the complex bonds of sisterhood. With palpable drama and delicious craft, Nova Ren Suma bursts onto the YA scene with the story that everyone will be talking about.

This is one of the most important studies in decades on Johannes Kepler, among the towering figures in the history of astronomy. Drawing extensively on Kepler's correspondence and manuscripts, James Voelkel reveals that the strikingly unusual style of Kepler's magnum opus, *Astronomia nova* (1609), has been

traditionally misinterpreted. Kepler laid forth the first two of his three laws of planetary motion in this work. Instead of a straightforward presentation of his results, however, he led readers on a wild goose chase, recounting the many errors and false starts he had experienced. This had long been deemed a "confessional" mirror of the daunting technical obstacles Kepler faced. As Voelkel amply demonstrates, it is not. Voelkel argues that Kepler's style can be understood only in the context of the circumstances in which the book was written. Starting with Kepler's earliest writings, he traces the development of the astronomer's ideas of how the planets were moved by a force from the sun and how this could be expressed mathematically. And he shows how Kepler's once broader research program was diverted to a detailed examination of the motion of Mars. Above all, Voelkel shows that Kepler was well aware of the harsh reception his work would receive--both from Tycho Brahe's heirs and from contemporary astronomers; and how this led him to an avowedly rhetorical pseudo-historical presentation of his results. In treating Kepler at last as a figure in time and not as independent of it, this work will be welcomed by historians of science, astronomers, and historians.

A quest for a priceless element—and revenge—fuels this far-future interstellar adventure that “reads like Moby-Dick at a strobe-light show” (Time). In 3172, the universe is divided between three political units: the stars and worlds of Draco, with Earth as its power center; the Pleiades Federation, on whose capital world, New Ark, lives the incredibly wealthy Von Ray family, descended from well-heeled merchants whose ancestors made their fortune as pirates; and the Outer Colonies, where, in their underwater mines, tiny quantities of the fabulously valuable Illyrion have been discovered. Lorq Von Ray was a playboy and young space-yacht-racing captain who, at a party at Earth’s Paris, clashed with Draco’s Prince Red. This sets Lorq on a demonic quest, through which he hopes to find vengeance. When a star goes nova and implodes, in the seething stellar wreckage for a few days—even hours—lie tons of Illyrion, the element that makes interstellar travel possible. To help him secure the priceless fuel, Lorq recruits a gypsy musician, a would-be novelist, and some other ragtag misfits. But an even more dangerous fuel than Illyrion is revenge . . . This ebook features an illustrated biography of Samuel R. Delany including rare images from his early career.

Ancient prophecies promise a future of hope, but who dares face the wrath of a powerful tyrant? Daeson seeks the counsel of the oracle that propelled him into a life of ruin and terrifying adventure. But the ruthless Chancellor Lockridge offers no quarter to his life-long friend turned traitor. Can Daeson trust the words of an ancient Immortal and inspire the slaves of

Jypton to rise up? Not only does the future of his people hang in the balance, but the entire galaxy as well!

Grayson Donald, seventeen years old, has just hanged himself from a basketball hoop next to a playground in Centreville, North Virginia (NoVA). The question is, Why? In this incisive dissection of the author's hometown, James Boice scratches its shiny suburban surface to reveal a place formed from "a cloud that slid west and met with the humidity and spent buckshot cartridges and Civil War bones clad in blue and gray to create concrete and vinyl siding and front yards laid in chunks, child care centers and video rental places." An exciting new voice in fiction, James Boice blends sharp social observations with dark humor and remarkable prose. In both passing glimpses and intimate interior monologues, we come to know Grayson's family, his fellow students, his neighbors, and many who knew him only slightly, if at all. A portrait of a town emerges that renders Grayson's suicide both devastating and inevitable. NoVA is a unique and fascinating depiction of the American suburb.

Evangeline is living the life of a normal teenager—going to school and hanging out with friends—until mysterious, severe symptoms begin appearing. After passing out in the middle of a party, life as she knows it spirals beyond her grasp. She is then diagnosed with a rare, genetic blood disorder that causes her body's white blood cells to kill the red ones. In the delirium of her deteriorating health, a door to a parallel world opens before her; however, once she steps through it, the portal closes, and she is unable to return to Earth. The place Evangeline now finds herself in is called Terra Nova, a world wherein vampires rule supreme, with

no traces of humanity left to speak of. Curious but afraid, she quickly learns that Terra Nova is not the shadow-side of Earth, but rather the tragic result of government experimentation. In order to survive, she must keep her mind open and accept the changes her body is undergoing; soon enough, those who she initially thinks are murderers become her trainers, whose help she must enlist if she ever hopes to return home—and soon enough, a romantic bond begins to bloom. Meanwhile, Evangeline's brother and friends back on Earth try to figure out what happened to her, and how the government is involved, and how to bring her home. Unbeknownst to any of them is the mysterious outcast Bambi, whose secrecy disguises her power in making a devastating choice: save one world at the risk of destroying the other.

Amid the chaos after the federal government is left powerless after an economic collapse, a teenager tries to survive alone, forced to adapt to homelessness and the constant threats of violence and starvation.

Delany's classic work of science fiction chronicles the intergalactic adventures of Mouse, an itinerant minstrel, and intrepid spaceship Captain Lorq Von Ray, as they set out to journey through the core of a recently imploded sun. Reprint. 12,500 first printing.

THE STORY: Drawn from the journals and letters found on the frozen body of Captain Scott, the action of the play blends scenes of the explorer and his men at various stages of their ordeal, with flashbacks of Scott and his young wife and with fate

The city of Terra Nova was founded on a lie: that the spirits who cross over from the spirit world are evil and must be captured for the safety of humanity. But Molly Stout and her family have learned that the spirits are thinking, feeling beings, enslaved to enrich the wealthy, especially the spirit-harvesting company Haviland Industries and its founder, Charles Arkwright. With the help of her family and the aetheric spirits Ariel and Legerdemain, Molly has been fighting to free the spirits. But Terra Nova runs on spiritual machinery, and for each factory they shut down, another takes its place. As Haviland Industries and the authorities of Terra Nova tighten their nets around Molly, she begins to question whether she is really making any difference or if her rebellion puts people and spirits at risk. Terra Nova is the sequel to Dominion.

Many experts agree that energy is the defining issue of this century. Economic recessions, foreign wars, and foreclosures are only a few of the results of America's dependence on oil. In *Terra Nova*, ecologist Eric Sanderson elucidates the interconnections between oil and money, cars and transportation, and suburbs and land use. He then charts a path toward renewed economic growth, enhanced national security, revitalized communities, and a sustainable environment: a new form of the American Dream. Taking a uniquely cross-disciplinary, accessible approach, Sanderson delves into natural history, architecture, chemistry, and politics, to show how the American relationship to nature shaped our past and predates our future. Illustrated throughout with maps, charts, and infographics, the book suggests how we achieve a better world through a self-reinforcing cycle of tax reform, retrofitted towns and cities, bicycles and streetcars, and investment in renewable energy.

When the newest Nova needs help with his busted helmet, he turns to Doc Green, the Incredible Hulk! But their quest soon takes them halfway across the universe and puts them in danger that even the Hulk can't punch his way out of! Then, Nova joins the X-Men and Guardians of the Galaxy for an epic adventure. With the Black Vortex in his possession, Sam must run for his life! But even when he returns to Earth, cosmic problems follow him, and his next challenge will test him more than any adventure has before. The entire world is under the gun, and it's up to Nova and his friends: Beta Ray Bill, Doc Green, the Guardians of the Galaxy and Cosmo, to save the planet! You won't believe how it all ends!

Collecting Nova Annual (2015) #1 and Nova (2013) #28-31.

36:00:00 The clock activates so suddenly in my mind, my head involuntarily jerks a bit to the side. The fog vanishes, dissipated in an instant as though it never was. Memories come slotting into place, their edges sharp enough to leave furrows, and suddenly I know. I know exactly who I am. My name is Lia Johansen, and I was named for a prisoner of war. She lived in the Tiersten Internment Colony for two years, and when they negotiated the return of the prisoners, I was given her memories and sent back in her place. And I am a genetically engineered human bomb. Lia Johansen was created for only one purpose: to slip onto the strategically placed New Sol Space Station and explode. But her mission goes to hell when her clock malfunctions, freezing her countdown with just two minutes to go. With no Plan B, no memories of her past, and no identity besides a name stolen from a dead POW, Lia has no idea what to do next. Her life gets even more complicated when she meets Michael Sorenson, the real Lia's childhood best friend. Drawn to Michael and his family against her better judgment, Lia starts learning what it means to live and love, and to be human. It is only when her countdown clock begins sporadically losing time that she realizes even duds can still blow up. If she wants any chance at a future, she must find a way to unlock the secrets of her past and stop her clock. But as Lia digs into her origins, she begins to suspect there's far more to her mission and to this war, than meets the eye. With the fate of not just a space station but an

entire empire hanging in the balance, Lia races to find the truth before her time—literally—runs out.
