Although Lawrence Kohlberg provided major ideas for psychological research in morality for decades, today some critics regard his work as outmoded, beyond repair, and too faulty for anybody to take seriously. These critics suggest that research would advance more profitably by taking a different approach. Postconventional Moral Thinking acknowledges particular philosophical and psychological problems with Kohlberg's theory and methodology, and proposes a reformulation called "Neo-Kohlbergian." Hundreds of researchers have reported a large body of findings after having employed Kohlberg's theory and methods to the Defining Issues Test (DIT), therefore attesting to the relevance of his ideas. This book provides a coherent theoretical overview for hundreds of studies that have used the DIT. The authors propose reformulations in the underlying psychological and philosophical theories. This book pulls together the analysis of criticisms of a Kohlbergian approach, a rationale for DIT research, and new theoretical ideas and new research.

This book explores the relationship between problem analysis, leadership, decision making, and change. It contains many problem scenarios, case studies, and vignettes.

Lesson study is a professional development process that teachers engage in to systematically examine their practice, with the goal of becoming more effective. Originating in

Japan, lesson study has gained significant momentum in the mathematics education community in recent years. As a process for professional development, lesson study became highly visible when it was proposed as a means of supporting the common practice of promoting better teaching by disseminating documents like standards, benchmarks and nationally validated curricula. While the body of knowledge about lesson study is growing, it remains somewhat elusive and composed of discrete research endeavors. As a new research area there is no coherent knowledge base yet. This book will contribute to the field bringing the work of researchers and practitioners together to create a resource for extant work. This book describes several aspects of Lesson Study, amongst others: it gives an historical overview of the concept, it addresses issues related to learning and teaching mathematics, it looks at the role of the teacher in the process. The last two sections of the book look at how lesson Study can be used with preservice mathematics teachers and at university mathematics methods teaching.

"Forensic and investigative accounting is a college textbook that covers the substance of forensic accounting. It includes coverage of the types of accounting issues involved, the roles and responsibilities of those involved, the legal basics and processes, modern approaches to fraud including cybercrime and much more."

This dissertation aims to construct a non-dogmatic defence of common sense. It tries to show why the absence of justification for the judgements of common sense, which the sceptic reveals, does not invalidate them.

Auditing Fundamentals in a South African Context 2e is a practical, applied, and engaging introductory textbook that supports students throughout the undergraduate level of the Auditing curriculum. The text is designed to enhance learning by supporting holistic understanding: theory is presented within the framework of the real-world business environment, assisting students to apply principles and standards with an understanding of their context. The text offers a clear pedagogical framework, which supports applied learning and develops independent, critical and reflective engagement with the subject matter. A continuing case study, which follows each stage of the audit of a South African company, demonstrates the practical application of learned principles and the integration of the auditing process with a typical audit client's business. The second edition is comprehensively revised to reflect all relevant, recent changes in the requirements of legislation, financial reporting and auditing pronouncements and codes, and addresses the new Code of Professional Conduct which was issued by the SA Institute of Chartered Accountants in the final quarter of 2018. Additional educational resources support teaching and learning,

Engineering, as a profession and business, is at the sharp end of the ethical practice. Far from being a bolt on extra to the 'real work' of the engineer it is at the heart of how he or she relates to the many different stakeholders in the engineering project. Engineering, Business and Professional Ethics highlights the ethical dimension of engineering and shows how values and responsibility relate to everyday practice. Looking at the underlying value systems that inform practical thinking the book offers a framework for ethical decision-making. Covering global corporate responsibility to the increasing

The chapters in this volume offer new and innovative ways to view values related to fairness, as well as work-related values, their antecedents and consequences. All have been peer reviewed prior to their publication. This volume consists of two parts. The first part focuses on value-based theories in organizations. The papers in this section address issues such as how to define, classify and study values; how values influence fairness by influencing what people believe what they deserve; how one's own identity relates to fairness perceptions, and how values and norms affect the way that people perceive or construe events.

Forensic Accounting and Fraud Examination introduces students and professionals to the world of fraud detection and deterrence, providing a solid foundation in core concepts and methods for both public and private sector environments. Aligned with the National Institute of Justice (NIJ) model curriculum, this text provides comprehensive and up-to-date coverage of asset misappropriation, corruption, fraud, and other topics a practicing forensic accountant encounters on a daily basis. A focus on real-world practicality employs current examples and engaging case studies to reinforce comprehension, while in-depth discussions clarify technical concepts in an easily relatable style. software cases introduces students to the powerful, user-friendly tools accounting professionals use to maximize auditing and analytic capabilities, detect fraud, and comply with documentation requirements, and coverage of current methods and best practices provides immediate relevancy to real-world scenarios. Amidst increased demand for forensic accounting skills, even for entry-level accountants, this text equips students with the knowledge and skills they need to successfully engage in the field.

This book provides a platform of scientific interaction between the three challenging and closely linked areas of ICT-enabled-application research and development: software intensive systems, complex systems and intelligent systems. Software intensive systems strongly interact with other systems, sensors, actuators, devices, other software systems and users. More and more domains are using software intensive systems, e.g. automotive and telecommunication systems, embedded systems in general, industrial automation systems and business applications. Moreover, web services offer a new platform for enabling software intensive systems. Complex systems research is focused on the overall understanding of systems rather than their components. Complex systems are characterized by the changing environments in which they interact. They evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents, which are increasingly characterized by their use of ontologies and their logical foundations, offer impulses for both software intensive systems and complex

systems. Recent research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences are vital for the future development and innovation of software intensive and complex systems.

The Internet bubble has collapsed and the largest bankruptcy in US history, Enron, has made the call for greater transparency in financial reporting more important than ever. Andrew Higson draws attention to what is a 'true and fair view' in reporting and critically examines accounting theory and modern practice.

"This book, "Research on Firm Finance Performance and Consumer Behaviour", plugs on the essential demand of highlighting consumer behavior and financial performance of companies, including banking and modern fintech-based institutions, particularly at the backdrop of an emerging giant - Indonesia. Contributed by prominent researchers at Universitas Indonesia, the topmost Business School in Indonesia, this book offers how wide array of theories are tested and used to frame models to recommend evidence-informed strategies of effective management. It also covers conversations around the concept, measurement, determinant of middle-class millennials; anti-corruption disclosure and its impact on firm value; effect of behavioural finance, financial and zakat literacy to the public; to roles of various forms of financial technology- (fintech-) based institutions, including peer-to-peer lending and charitable crowdfunding to our society, and other thought-provoking questions and discussions. We are pleased to present this important book to government policymakers and

GOVERNMENT AUDITING STANDARDS: 2011 Revision

Auditing mengalami perkembangan pesat, dimulai dari aktivitas pemeriksaan catatan atas penerimaan pajak Kerajaan Mesir Kuno, pemeriksaan atas otorisasi pembayaran-pembayaran di Kerajaan Romawi, aktifitas audit atas perusahaan dimulai sejak zaman revolusi industri (Inggris pada pertengahan 1800an). Profesi ini pada waktu itu hanya dikhususkan untuk mendeteksi kecurangan dalam laporan keuangan dengan melakukan pemeriksaan secara rinci. Kecurangan merupakan masalah yang sangat memprihatinkan pada awal sejarah audit. Akhir abad ke-19 merupakan titik balik dalam sejarah audit ketika hukum English Companies Act 1892 diberlakukan. English Companies Act 1892 mengharuskan semua perusahaan besar maupun perusahaan kecil memerlukan review yang objektif dari seorang professional khusus yang independen dan mempunyai skill untuk memeriksa laporan keuangan perusahaan tersebut. Auditing semula dilakukan oleh satu/ beberapa orang pemegang saham, kemudian berkembang pesat dan ditandai dengan mulai tumbuhnya kantor akuntan public seperti Deloitte & Co, Price Waterhouse & Co.

Poverty is a social problem that has never been discussed. Both in terms of the poverty rate, the impact it causes, the factors that cause it, to the alternatives to overcome it. The phenomenon of poverty is related to various dimensions of life, so that the problem of poverty becomes very complex. The problem of poverty requires multisectoral handling, it cannot be resolved only from one sector but requires a collaborative approach from various sectors in government as well as with the private sector and the community. Because poverty does not only concern the economic, education, health, infrastructure, but also social, cultural and even political issues. So that a multidimensional policy is needed with a coping strategy that involves many parties in an integrated manner. In fact, the government has made various efforts to reduce poverty, both at the national level and for districts and cities. Some of these efforts include opening job opportunities, providing direct assistance in the form of materials to the poor, as well as community empowerment as a preventive measure taken in order to develop community competencies and skills. Therefore, poverty reduction

remains a focus in development and is a shared responsibility, not only the central government and local governments, but contributions and collaboration from various parties are needed. In the direction of a new life order, poverty reduction becomes a crucial topic to be addressed. The National Seminar on "Community Empowerment and Poverty Reduction Strategies" is a momentum to bring together various critical views and thoughts from various fields of science related to strategies that can be carried out in reducing poverty. It is hoped that this national seminar will produce an appropriate strategy in accelerating poverty reduction in Indonesia in general and in Bali in particular. Electoral management bodies (EMBs) need to become more professional if they are to retain the trust of voters. This handbook was developed for electoral administrators and those involved in reforming EMBs. It provides comparative experience of and best practices on EMB structures and funding models, as well as means for evaluating performance. A range of case studies illustrate examples from specific contexts in Afghanistan, Armenia, Bosnia and Herzegovina, Cambodia, Costa Rica, Haiti, India, Kenya, Republic of Korea, Liberia, Mexico, Nigeria, Norway, Senegal, Republic of Seychelles, Timor-Leste, Tonga, Tunisia, Ukraine, United Kingdom and United States. This new and revised edition includes updated country-level data and case studies and significantly expanded sections on the role of gender, professional development and technology in elections.

Electronic voting is often seen as a tool for making the electoral process more efficient and for increasing trust in its management. Properly implemented, e-voting solutions can increase the security of the ballot, speed up the processing of results and make voting easier. However, the challenges are considerable. If not carefully planned and designed, e-voting

Get Free Pengaruh Skeptisisme Profesional Kompetensi Dan

can undermine the confidence in the whole electoral process. Technology upgrades in elections are always challenging projects that require careful deliberation and planning. Introducing e-voting is probably the most difficult upgrade as this technology touches the core of the entire electoral process—the casting and counting of the votes. E-voting greatly reduces direct human control and influence in this process. This provides an opportunity for solving some old electoral problems, but also introduces a whole range of new concerns. Consequently, e-voting usually triggers more criticism and opposition and is more disputed than any other information technology application in elections. This Policy Paper outlines contextual factors that can influence the success of e-voting solutions and highlights the importance of considering these factors before choosing to introduce new voting technologies.

Section I examines historical philosophical understandings of expertise in order to situate the current institution of bioethics. Section II focuses on philosophical analyses of the concept of expertise, asking, among other things, how it should be understood, how it can be acquired, and what such expertise warrants. Finally, section III addresses topics in bioethics and how ethics expertise should or should not be brought to bear in these areas, including expertise in the court room, in the hospital room, in the media, and in making policy.

2. A GUIDED HISTORICAL TOUR As Scott LaBarge points out, Plato's dialogues can be viewed as an extended treatment of the concept of moral expertise, so it is fitting to begin the volume with an examination of "Socrates and Moral Expertise". Given Socrates' protestations (the Oracle at Delphi notwithstanding) that he knows nothing, LaBarge observes that it would be interesting to determine both what a Socratic theory of moral expertise might be and whether Socrates qualified as such an expert. Plato's model of moral

expertise is what LaBarge calls “demonstrable expertise”, which is concerned mainly with the ability to attain a goal and to explain how one did it. The problem with this account is that when one tries to solve the various problems in the model – for example, allowing that moral expertise is not an all-or-nothing skill – then one is immediately faced with the “credentials problem”. As LaBarge puts it, “. . .
