Emphasis is placed on the analysis and interpretation of the end result of financial reporting — financial statements.

“... a must read for those wanting to craft a vocation in finance.” -- Adrian Gore, CEO, Discovery Group; “... no better book for a student or practitioner who wants more than is usually on offer in finance courses in our universities.” -- Paul Oslington, Professor of Economics and Dean of Business, Alphacrucis College, Sydney. To develop a vocation we ask: what do I want to be remembered for? This involves aspiring to personal integrity and a life well lived. Those working in the financial sector fulfill vocations by finding ways to serve social purposes, to allocate resources efficiently and to provide financial security—while remembering the needy. This means contributing to institutions, where people can flourish personally and create appropriate products and services. The ethics of those working on finding their vocation do not flow from rules and obligations, but from a personal commitment to seeking what is good. This life is based on the

fundamental personal virtue, integrity. This book is written for those who aspire to the cultivation of the personal virtues of wisdom, self-control, courage, and justice.

They’re wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling Pound Foolish, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.

Protect and grow your finances with help from this definitive and practical guide to behavioral economics—revised and updated to reflect new economic realities. In their fascinating investigation of the ways we handle money, Gary Belsky and Thomas Gilovich reveal the psychological forces—the patterns of thinking and decision making—behind seemingly irrational behavior. They explain why so many otherwise savvy people make foolish financial choices: why investors are too quick to sell winning stocks and too slow to sell losing shares, why home sellers leave money on the table and home buyers don't get the biggest bang for their buck, why borrowers pay too much credit card interest and savers can't sock away as much as they'd like, and why so many of us can't control our spending. Focusing on the decisions we make every day, Belsky and Gilovich provide invaluable guidance for avoiding the financial faux pas that can cost thousands of dollars each year. Filled with fresh insight; practical advice; and lively, illustrative anecdotes, this book gives you the tools you need to harness the powerful science of behavioral economics in any financial environment.
