Peer learning allows a positive use of differences between pupils, turning them into learning opportunities. Yet education professionals often remain unfamiliar with the principles necessary to guarantee its effectiveness. The aim of this book is to help practitioners establish well-

structured and effective peer learning projects using a variety of methods. It introduces and defines cooperative learning (mutual peer interaction) and peer tutoring (directional peer interaction) – outlining general organisational principles that will help practitioners implement peer learning in either of these forms. The authors consider how to prepare and train learners to undertake their roles effectively, and how to organise and monitor the process of interaction as it is happening. They then look at how these systems actually operate in the classroom, exploring how the organisational principles work in practice and giving many practical examples. Subsequently three successive chapters consider how to structure peer interactions in cooperative learning, same-age peer tutoring and cross-age peer tutoring. Finally, the advantages and problems, and the potential and challenges, of peer learning are examined. The book should be read in stages, with each part being able to be read on its own – thus providing time for reflection. Within each part, readers can choose to focus on cooperative learning or peer tutoring. The successive focuses on definitions, general principles of implementation and practical issues of implementation should help practitioners build their skills and confidence. Many choices between methods are described, and when teachers are confident in one method they may then consider trying a new method. It is the authors' hope that the book will become a model for peer learning by sharing with readers the skills of other practitioners, and thereby helping all children to develop to their full potential.

A case-based companion study guide to Pharmacotherapy Principles and Practice, 2e – learn how to apply your knowledge to actual patient situations Pharmacotherapy Principles and Practice Study Guide uses 98 cases to help you learn how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner, similar to what you would see in a clinical setting and focuses on one primary topic or problem. Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case, you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those originally developed by the American Society of Health System Pharmacists Clinical Skills program. Each case includes: Learning Objectives Patient Presentation Targeted Questions followed by a hint that refers you to pages in Pharmacotherapy Principles and Practice, 2e where you can find the information to answer the question Follow-up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races Case Summary

This comprehensive introductory text presents the theory and practice of financial and managerial accounting (the balance being about two-thirds financial and one-third managerial). The approach is practical, beginning with sole proprietorships before going on to corporate accounting.

Written by Jack Mogab and Bruce McClung at Southwest Texas State University, this book, provides the following elements for each chapter: a Pretest; a Learning Objective Grid; a Key Point Review with Learning Tips; some Self-Tests (Key Term Matching, Multiple Choice, Problems) with answers; and an extension of the guide to the Web Site, where students may practice with graphing.

"A case-based companion study guide to Pharmacotherapy Principles and Practice, 3e Pharmacotherapy Principles and Practice Study Guide, 3e used 100 cases to teach students how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner, similar to what is seen in a clinical setting and focuses on one primary topic or problem. Each case is accompanied by 6-7 questions NEW cases authored by nurse practitioners and medical assistants Immediately applicable to situations seen in daily practice"--

Letters to a New Student is a study skills book with a twist. You decide how to read it. Based on a series of short, informal, problem page letters that you can read in any order, the book uses principles of human psychology, teaching, and coaching practice to offer a refreshing approach to study skills and learning techniques. The letters form a brief 'survive and thrive' study guide to work smarter not harder and offer advice on topics such as motivation, stress, revision, and assignments. It's a tried-and-tested, blueprint to make information stick with less effort. The book takes a holistic approach to learning. It covers health and wellbeing, the 'nuts-and-bolts' shortcuts, the obstacles, and the pitfalls. It also includes short learning principles and cross-references to other entries, with practical advice in response to the frequently asked questions many students ask during their studies. Letters to a New Student is for any student under pressure, parents and family who want to offer support, or anyone with interest in lifelong learning. It's written by a psychologist, teacher, academic coach, and advice columnist, with over 20 years professional experience.

Although verbal learning offers a powerful tool, Mayer explores ways of going beyond the purely verbal. Recent advances in graphics technology and information technology have prompted new efforts to understand the potential of multimedia learning as a means of promoting human understanding. In this second edition, Mayer includes double the number of experimental comparisons, 6 new principles - signalling, segmenting, pertaining, personalization, voice and image principles. The 12 principles of multimedia instructional design have been reorganized into three sections - reducing extraneous processing, managing essential processing and fostering generative processing. Finally an indication of the maturity of the field is that the second edition highlights boundary conditions for each principle research-based constraints on when a principle is likely or not likely to apply. The boundary conditions are interpreted in terms of the cognitive theory of multimedia learning, and help to enrich theories of multimedia learning.

This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.
