Insuring law firms is a risky business - insurers will often pay back 80% of the premium paid by the practice in claims. This is one reason why the cost of securing professional indemnity insurance (PII) cover has spiralled in recent years, and why insurers' requirements are getting stricter. The report discusses recent changes within the PI insurance market that have had an impact on availability of cover and cost of premiums - including the failure of insurers in the market; the property boom pre-2008, which has led to an increase in claims and fraudulent transactions; and the subsequent economic downturn, which has raised questions over the financial stability of practices. The report outlines the factors which will affect the renewal process in 2014, and provides expert advice on developing a framework to ensure a law firm is prepared for the in-depth scrutiny of the insurance brokers they apply to. It also examines what the future holds for PI insurance.

Lan Ark in the Spring: The pan de sal Girl is a crime-thriller, written by the author H. Valencia. The conservative town of Lan Ark was the last place one would expect a fifteen year old, from the old part of town, to be murdered. When a group of her classmates are arrested, the District Attorneys office as well as the general public are all but convinced of their guilt. In this twisting tale, Kyle Makoa, a middling attorney at a middling law firm, and his mysterious investigator Benjamin Serrano suspect that the authorities have made a mistake. As the first day of the trial nears, the state of affairs is further complicated by a sequence of peculiar happenings. Within the next few weeks there is a precarious relationship between the defense attorney and Reena Escueta (the victims mother), an attack by a naughty ungooy, a hunger strike from within an all-female Juvenile Detention Center, a series of coded messages, a string of malevolent spells cast by practitioners of an ancient form of sorcery known as dark kulam, and more. In a town where very little is as it seems, will the truth of a young girls murder be revealed?

The Bible faithfully describes the construction of an object that has mystified the public and scholars throughout history; The Ark of the Covenant, a simple wooden box overlaid with gold that was used by Moses to conquer the middle east. But what it looked like and how it worked are questions that remained shrouded in mystery. Until nowã Jim Wilson, a graphic artist and ordinary citizen, never gave the Ark any thought until a publisher asked him to make drawings of it for a magazine article. To do this Jim was tasked with doing research that led to an amazing discovery which came not from what others had said about the Ark but from the Old Testament's book of Exodus in his family Bible. This project would evolve and change his life in ways he would never have believed. At the publisher's request, this title is sold without DRM (Digital Rights Management).

The primary goal of this book is to help law firms adapt to a rapidly changing marketplace by providing insights into what has worked at other firms and what hasn't. Many articles and books have been written by law school and business school professors and by countless consultants analyzing how the legal profession is changing. The only thing that's been missing from the conversation is public statements by the people who actually run large law firms. These senior decision makers rarely publish anything on their tactics and strategies. They are the ones who deal with these issues every day and whose very livelihood depends on coming up with the right answers. What do they think? To answer this question, LegalBizDev founder Jim Hassett interviewed leaders from 50 AmLaw 200 firms in 2013 and 2014. This is the only research on the topic which is based on confidential in-depth interviews with chairs, managing partners, senior partners, and firm executives such as CEOs, COOs, and CFOs. The name of every individual who participated in the research is confidential and all quotes are anonymous. This approach has enabled senior decision makers to speak frankly and openly about what they really think. Since the participants in the study were promised that they would not be quoted by name, they were unusually frank in their responses, including the law firm chairman who said that "lawyers are about as dumb as you could possibly be about understanding how our product is made. The lawyers who understand how to make it and who can manage that process efficiently are going to be the winners." The law firm leaders also felt free to speak about both the business problems they face and possible solutions, like the managing partner who noted that "I have a \$10 million practice. But that could be a disaster for a firm, because it could cost them \$11 million to get \$10 million. But nobody ever talks about it that way." According to Altman Weil Principal Tom Clay, "Although Jim's interviews were with 50 large law firm leaders, his commentary and takeaways should be taken to heart by every law firm, whatever its size."

WHILE DEFENDING THE ACCUSED IN A MILITARY COURTMARTIAL, NEW YORK CITY'S RENOWNED DEFENSE ATTORNEY, SOLOMON GOLDMAN, finds himself drugged and abducted in broad daylight, only to awaken inside a nuclear submarine on its way to the Middle East. His captor, a beautiful and mysterious Egyptian agent named Eteye Azeb, tells Goldman that his brother is commanding a secret military operation south of Bagdad, at the lost city of Babylon, where an uncovered

religious scroll obscurely mentioned in the bible contains an ancient Egyptian code. This code leads to the hidden location of the most sought after treasure of antiquity—the Ark of the Covenant. Goldman's brother has now mysteriously gone missing with the scroll and is wanted for theft and treason. The Middle East is pushed to the brink when Iranian commandos recover abandoned American nuclear torpedoes from the ocean's floor. The stakes are raised even further when Goldman is caught up in an international conspiracy to recover and use the sacred Ark of the Covenant as a modern day military weapon. For reasons Solomon Goldman doesn't yet understand, all eyes are on him as he tries to pick up the trail of his missing brother and locate the clues to the missing treasure map. In a breathless race over four continents, Goldman must follow the signs, hidden away for millenniums, that lead to the Ark, all while struggling with his own religious doubts and unbeliefs. At every turn fate seems to draw him deeper into Eteye's cryptic world of unexplained past connections. Who really is this woman? Unless he can decipher the biblical secrets and find the ancient Ark before the world's superpowers do, the Ark of War may be lost forever—or worse yet, used as a modern day weapon of mass destruction.

When ancient evil emerges, it can only be stopped by a two-thousand-year-old sleuth Ten years ago, Douglas Zadig emerged from the mist on an English moor, his clothes tattered, his speech slurred, and his mind completely blank. Zadig comes to Maine on the lecture circuit, and in the frigid northern winter, just as suddenly as he first appeared, he is killed. The case fascinates Simon Ark, a two-thousand-year-old Coptic priest on a ceaseless quest to hunt out the world's ultimate evil. In "The Man from Nowhere" and the other stories in this volume, Ark flits from murder to murder, seeking supernatural explanations for the crimes. But as he knows all too well, no mystical force can compete with the evil inside the souls of men.

Earth's wealthiest man attempts to save humanity from an impending apocalypse The planet's first and only trillionaire, Henry Peel, did not make his fortune by being a fool. A gifted inventor and scientist, he possesses an imagination on the scale of history's greatest thinkers, and he has turned it to the problem of Earth's core. To begin mankind anew, Henry Peel is going to lead us to the stars. He gathers the world's leading physicists and engineers and asks them to design a spaceship large enough to safeguard a sample of humanity and durable enough to survive a thousand-year voyage. An in-depth look at how the use of data has become inextricably linked with the practice of law and how it will influence the law firm of the future.

The Endangered Species Act (ESA) may be the most powerful environmental law in the United States. Enacted in 1973, the ESA prohibits any actions that may cause harm to endangered plants and animals or the ecosystems upon which they depend. But although more than 1,200 species are protected under the Act, most remain in peril. The ESA may have saved some species from the brink of extinction, but there is little evidence it is working as intended to recover endangered and threatened species. In some cases, the Act's extensive regulatory requirements may actually discourage conservation efforts. In *Rebuilding the Ark: New Perspectives on Endangered Species Act Reform*, Jonathan H. Adler leads a group of environmental law experts in evaluating the ESA's successes and failures and exploring multiple avenues for reform. The authors examine methods for incentivizing conservation on private land and water, for revising and standardizing the ESA's regulatory framework, and for increasing transparency, accountability, and public participation in the Fish and Wildlife Service and other conservation agencies. *Rebuilding the Ark* also considers how the Act should be reformed to address the threat of climate change, and how ESA reform in the United States may affect species conservation overseas. The Endangered Species Act has not been altered for over twenty-five years. Debates over ESA reform are often contentious and hampered by partisan infighting and pressure from interest groups. But reform is crucial if we are to achieve the ESA's ambitious goals and conserve the world's endangered plants and animals. *Rebuilding the Ark* is a valuable resource for policymakers, conservationists, business owners, and concerned citizens alike.
