If Amazon can't win in China, can anyone? When Amazon CEO Jeff Bezos visited China in 2007, he expected that one day soon China would be a double-digit percentage of Amazon's sales. Yet, by 2019, Amazon, the most powerful and successful ecommerce company in the world, had quit China. In *Winning in China: 8 Stories of Success and Failure in the World's Largest Economy*, Wharton experts Lele Sang and Karl Ulrich explore the success and failure of several well-known companies, including Hyundai, LinkedIn, Sequoia Capital, and InMobi, as more and more businesses look to reap profits from the demand of 1.4 billion people. Sang, Global Fellow at the Wharton School of the University of Pennsylvania, and Ulrich, Vice Dean of Entrepreneurship and Innovation at the Wharton School, answer four critical questions: Which factors explain the success (or failure) of foreign companies entering China? What challenges and pitfalls can a company entering China expect to encounter? How can a prospective entrant realistically assess its chances? Which managerial decisions are critical, and which approaches are most effective? Sang and Ulrich answer these questions by examining the stories of eight well-known and respected companies that have entered China. They study: How Norwegian Cruise Line's entry into China displays how cultural differences can boost or sink different companies; How Intel, one of the oldest, most respected firms in Silicon Valley, thrived in a country that seems to favor agile upstarts; How Zegna, the Italian luxury brand, has emerged as another surprising success story and how it plans to

navigate new headwinds from the COVID-19 pandemic. Through these engaging and illuminating stories, Sang and Ulrich offer a framework and path for organizations looking for a way to successfully enter the world's largest economy. History can be a teacher, and China, a country with 3,500 years of written history, has much to teach.

Achieve your dream of retiring abroad while on a budget The International Living Guide to Retiring Overseas on a Budget provides a detailed guide to one of the least-known but most effective retirement strategies in today's chaotic economic environment: retiring abroad. The premise is simple: Enjoy a happier, healthier, more fulfilling retirement than you could possibly afford in the U.S. or Canada by finding the right overseas retirement haven. The book reveals those affordable havens and the strategies for successfully making the move that could save your retirement. This collection of papers presented to the Commonwealth Secretariat/World Bank Joint Task Force conferences sets out an agenda for future national, regional and international actions to address economic vulnerabilities of small states. In 1998, after thirteen years of providing investment advice for Smith Barney, Bill Schultheis wrote a simple book for people who felt overwhelmed by the stock market. He had discovered that when you simplify your investment decisions, you end up getting better returns. As a bonus, you gain more time for family, friends, and other pursuits. The Coffeehouse Investor explains why we should stop thinking about top-rated stocks and mutual funds, shifts in interest rates, and predictions for the economy. Stop trying to beat the stock market average, which few “experts” ever do. Instead, just remember three simple principles: Don’t put all your eggs in one basket. There’s no such thing as a free lunch. And save for a rainy day. By focusing more on your passions and creativity and less on the daily ups and downs, you will actually build more wealth—and improve the quality of your life at the same time.

This research examines the extent to which expatriate return on investment (ROI) is

operationalised and subsequently managed in global firms. Systems theory and psychological contract theory are applied in two qualitative studies (N= 1 02). Four research questions are addressed in the research. The first three research questions seek to understand how expatriate ROI is defined and measured in global firms, and the barriers that impede measurement. The fourth research question seeks to identify the factors that are likely to influence changes in expatriate ROI to the firm. In study one, interviews are conducted with 51 mobility managers drawn from 18 industries and five world regions. Key findings suggest that firms do not have formal procedures in place to measure expatriate ROI and instead rely heavily on informal procedures and processes that are seldom aligned to a global strategy. Hence, a systems theory approach towards the operationalisation and management of expatriate ROI is lacking, where considerable cultural, operational, and strategic barriers to measuring and managing ROI are found to exist. In addition, evidence is found that measuring expatriate ROI may not be an important goal for some managers in global firms, where the utilisation of long-term expatriates is often a cost of doing business for which a formal measure may be unnecessary. Instead, the management of expatriates in terms of the practices that are used to support their activities and how the outcomes of those activities impact

broader firm performance seem to be more important concerns. In study two, interviews are conducted with 51 expatriate employees drawn from five case firms that participated in study one, representing different industries across six world regions. Key findings suggest that while a strategic, value-based perspective towards international staffing practices is desired and sought by global firms and their expatriate employees, it can be concluded that the effective assessment and management of strategic value is not widely adopted in practice. Furthermore, up to one-third of expatriates are seeking or considering external job opportunities during an international assignment, where poor career management support and changes to expatriate compensation are found to explain turnover intentions. A deeper understanding of the psychological factors relating to expatriate retention and turnover, including the motivation to go abroad, therefore emerges. On this basis, the retention of high-level professional and managerial talent during a long-term international assignment emerged as an important issue that could have serious implications for the achievement of a firm's broader international staffing objectives, as well as the career aspirations of expatriate employees. Overall, the research demonstrated that attention to defining and refining the construct of expatriate ROI has been lacking in global firms. The research has

therefore facilitated the development and testing of a conceptual definition and framework to explain expatriate ROI from which it can be concluded that expatriate ROI in practice is organisationally specific, causally ambiguous in terms of the relationship between strategy, HRM, and firm performance, and complex. The research contributes a comprehensive overview of the combination of strategic, contextual, and operational factors that contribute towards the ROI that is sought from long-term international assignments.

China has recently emerged as one of Africa's top business partners, aggressively pursuing its raw materials and establishing a mighty presence in the continent's booming construction market. Among major foreign investors in Africa, China has stirred the most fear, hope, and controversy. For many, the specter of a Chinese neocolonial scramble is looming, while for others China is Africa's best chance at economic renewal. Yet, global debates about China in Africa have been based more on rhetoric than on empirical evidence. Ching Kwan Lee's *The Specter of Global China* is the first comparative ethnographic study that addresses the critical question: Is Chinese capital a different kind of capital? Offering the clearest look yet at China's

state-driven investment in Africa, this book is rooted in six years of extensive fieldwork in copper mines and construction sites in Zambia, Africa's copper giant. Lee shadowed Chinese, Indian, and South African managers in underground mines, interviewed Zambian miners and construction workers, and worked with Zambian officials. Distinguishing carefully between Chinese state capital and global private capital in terms of their business objectives, labor practices, managerial ethos, and political engagement with the Zambian state and society, she concludes that Chinese state investment presents unique potential and perils for African development. *The Specter of Global China* will be a must-read for anyone interested in the future of China, Africa, and capitalism worldwide.

A leading thinker on Canada's place in the world contends that our country's greatest untapped

resource may be the three million Canadians who don't live here. Entrepreneurs, educators, humanitarians: an entire province's worth of Canadian citizens live outside Canada. Some will return, others won't. But what they all share is the ability, and often the desire, to export Canadian values to a world sorely in need of them. And to act as ambassadors for Canada in industries and societies where diplomatic efforts find little traction. Surely a country with people as diverse as Canada's ought to plug itself into every corner of the globe. We don't, and sometimes not even when our expats are eager to help. Failing to put this desire to work, contends bestselling author and longtime foreign correspondent John Stackhouse, is a grave error for a small country whose voice is getting lost behind developing nations of rapidly increasing influence. The soft power we once boasted is getting softer, but we have an unparalleled resource, if we choose to use it. To ensure Canada's place in the world, Stackhouse argues in Planet Canada, we need this exceptional province of expats and their special claim on the twenty-first century.

Expatriation is a big topic, and is getting bigger. Over 200 million people worldwide now live and work in a country other than their country of origin. Tens of billions of dollars are spent annually by organizations that move expatriates around the world. Yet, despite the substantial costs involved, expatriation frequently

results in an unsatisfactory return on investment (ROI), with little or no knowledge as to how to improve it. Why is this so? Drawing on more than a decade of expertise, research, and publications in top journals, the authors provide you real solutions to achieve more than a satisfactory ROI from expatriates—with rule number one being: Understand expatriates themselves. This book provides a practical “insider’s” guide that reveals why expatriates seek and accept international assignments; how they feel impacted by new forms of remuneration and other working conditions; how international assignments fit in with their longer-term career aspirations; and what complications arise in terms of their families. Whether you’re a manager or consultant, inside you’ll learn what modern-day global mobility is like (based on the authors’ decade-long study with nearly four hundred expatriates and their managers, as well as over a hundred who were interviewed personally), how it is changing, and why now, more than ever, a hard-nosed ROI approach is necessary.

in Guinea, Liberia, and Sierra Leone. The Ebola virus has been known since 1976, when two separate outbreaks were identified in the Democratic Republic of Congo (then Zaire) and South Sudan (then Sudan). However, because all Ebola outbreaks prior to that in West Africa in 2014â€"2015 were relatively isolated and of short duration, little was known about how to best manage patients to improve survival, and there were no approved therapeutics or vaccines. When the World Health Organization declared the 2014-2015 epidemic a public health emergency of international concern in August 2014, several teams began conducting formal clinical trials in the Ebola affected countries during the outbreak. Integrating Clinical Research into Epidemic Response: The Ebola Experience assesses the value of the clinical trials held during the 2014â€"2015 epidemic and makes recommendations about how the conduct of trials could be improved in the context of a future international emerging or re-emerging infectious disease events.

In the third part, the authors share the 18 investment strategies that in their vast experience have worked for thousands of their clients - and themselves - over the years. The last section discloses six case studies where you will discover how six very different investors - a young single, a couple who started investing early, a couple who left it a bit late (luckily it's rarely too late), a single parent and a couple with no kids - all built portfolios which will deliver \$2,000 income in their retirement. And it's written in plain-English, in a friendly style that makes it an easy book to read.

unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Exploit your offshore status to build a robust investment portfolio Most of the world's 200 million expats float in stormy seas. Few can contribute to their home country social programs. They're often forced to fend for themselves when they retire. The Global Expatriate's Guide to Investing is the world's only book showing expats how to build wealth overseas with index funds. Written by bestselling author, Andrew Hallam, it's a guide for everyone, no matter where they are from. Warren Buffett says you should buy index funds. Nobel prize winners agree. But dangers lurk. Financial advisors overseas can be hungry wolves. They don't play by the same set of rules. They would rather earn whopping commissions than follow solid financial principles. The Global Expatriate's Guide To Investing shows how to avoid these jokers. It explains how to find an honest financial advisor: one that invests with index funds instead of commission paying

windfalls. You don't want an advisor? Fair enough. Hallam shows three cutting edge index fund strategies. He compares costs and services of different brokerages, whether in the U.S. or offshore. And he shows every nationality how to invest in the best products for them. Some people want stability. Some want strong growth. Others want a dash of both. This book also answers the following questions: How much money do I need to retire? How much should I be saving each month? What investments will give me both strong returns, and safety? The Global Expatriate's Guide To Investing also profiles real expats and their stories. It shows the mistakes and successes that they want others to learn from. It's a humorous book. And it demonstrates how you can make the best of your hard-earned money.

Managing expatriates and other 'traditional' internationally mobile workers is a significant part of many academic programmes and the focus of some specialist ones. But we cannot answer the big questions about working internationally if we exclude from our teaching people who do not fit into our usual conceptions and assumptions about who it is that organisations employ. Written by two of the most frequently published authors in the field, this is the only textbook to specialise in all the widely-accepted types of international work such as high-status expatriation, international business travel, short-term project work, and international commuting, while also covering the management of low-status expatriates, qualified immigrants, economic and low-skilled migrants, and refugees. Topics include cost effective global HRM, value and return on investment, localisation, home- and host-based compensation, talent management, human rights, safety and security, and duty of care - all examined from the differing perspectives of organisational practitioners and international workers and their families. In nine clear chapters, this book covers everything that a teacher or student of

expatriation and global mobility needs to know, with each chapter written specifically as a primer for teaching sessions. Chapters are research-led and data driven, outlining current research on the topic. Included for each chapter are learning objectives, chapter summaries, key theories, detailed reference lists, additional reading lists, high-quality diagrams and tables, class activities, and reflective questions suitable for exam preparation. Supplemented with consulting reports and surveys that are highly applicable to (working) MBA students, this is the ideal textbook for any contemporary course in expatriate management or international HRM needing to take it to the next level.

The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.
