The narrator, James "Jim" Hawkins, is the young son of the owners of the Admiral Benbow Inn. An old drunken seaman named Billy Bones becomes a long-term lodger at the inn, only paying for about the first week of his stay. Jim quickly realizes that Bones is in hiding, and that he particularly dreads meeting an unidentified seafaring man with one leg. Some months later, Bones is visited by a mysterious sailor named Black Dog. Their meeting turns violent, Black Dog flees and Bones suffers a stroke. While Jim cares for him, Bones confesses that he was once the mate of a notorious late pirate, Captain Flint, and that his old crew-mates want Bones' sea chest. Some time later, another of Bones' crew mates, a blind man named Pew, appears at the inn and forces Jim to lead him to Bones. Pew gives Bones a paper. After Pew leaves, Bones opens the paper to discover it is marked with the Black Spot, a pirate summons, with

the warning that he has until ten o'clock to meet their demands. Bones drops dead of apoplexy (in this context, a stroke) on the spot. Jim and his mother open Bones' sea chest to collect the amount due to them for Bones' room and board, but before they can count out the money that they are owed, they hear pirates approaching the inn and are forced to flee and hide, Jim taking with him a mysterious oilskin packet from the chest. The pirates, led by Pew, find the sea chest and the money, but are frustrated that there is no sign of "Flint's fist". Customs men approach and the pirates escape to their vessel, all except for Pew, who is accidentally run down and killed by the agents' horses.... (Excerpt from Wikipedia)

The year 2003 marked the fiftieth anniversary of James Watson's and Francis Crick's discovery of the structure of DNA, which began a revolution in the biological sciences and radically altered the way humans view life and themselves. In this poetic account Erwin Fleissner, an eminent cancer researcher and teacher, offers a personal and professional reflection on the most significant developments in molecular genetics and cell biology over the past fifty years. *Vital Harmonies* is a sweeping look at these crucial scientific advances and an insider's perspective on what scientists have actually learned from them. Contrasting the humanistic side of scientific research with more deterministic or "mechanical" explanations of life processes, Fleissner discusses everything from natural selection to the tradition of rational inquiry stemming from the Enlightenment. He goes on to describe the structures of macromolecules and their "organizing" principles as well as cancer genes, stem cells, and the Human Genome Project. He also explores neuronal cells and the emergence of consciousness and how biological evolution is the foundation of our personal reality as well as our global responsibility. Fleissner asserts that scientific investigations cannot negate our essential "humanness" nor should the public fear them. Taking an optimistic perspective, he argues that a deeper knowledge of ourselves as biological entities will provide us, ultimately, with greater health, serenity, and self-knowledge. *Vital Harmonies* gives readers, whatever their background, an engaging analysis of some of the most important questions facing humanity today.

Both a prelude and a continuation to Raoul Ruiz's film, *Treasure Island*, made in 1984, *In Pursuit of Treasure Island* presents itself as the follow-up, or rather a pursuit, of Stevenson's novel. It is a formidable example of the way Ruiz parodies the text and plunges the story inside the story before losing the reader in a labyrinth of strange images.

Synopsis coming soon.....

Treasure Island is an adventure novel by Scottish author Robert Louis Stevenson, narrating a tale of "buccaneers and buried gold". Its influence is enormous on popular perceptions of pirates, including such elements as treasure maps marked with an "X", schooners, the Black Spot, tropical islands, and one-legged seamen bearing parrots on their shoulders.

A young slacker decides to live her life according to Robert Louis Stevenson's classic adventure: "A rollicking tale, shameless, funny and intelligent" (*The New York Times*). When a college graduate with a history of hapless jobs (ice cream scooper, gift wrapper, laziest ever part-time clerk at The Pet Library) reads Robert Louis

Stevenson's novel *Treasure Island*, she is dumbstruck by the timid design of her life. When had she ever dreamed a scheme? When had she ever done a foolish, overbold act? When had she ever, like Jim Hawkins, broken from her friends, raced for the beach, stolen a boat, killed a man, and eliminated an obstacle that stood in the way of her getting a hunk of gold? Convinced that Stevenson's book is cosmically intended for her, she redesigns her life according to its Core Values: boldness, resolution, independence, and horn-blowing. Accompanied by her mother, her sister, and a hostile Amazon parrot that refuses to follow the script, our heroine embarks on a domestic adventure more frightening than anything she'd originally planned. *Treasure Island!!!* is the story of a ferocious obsession, told by an original voice—"insane, hilarious, and irreverent" (Alice Sebold). "Highly original . . . will keep you entertained in spite of (or more accurately, because of) its toxic narrator." —Library Journal "A hoot." —Kirkus Reviews

Perhaps the greatest of all adventure stories for boys and girls, *Treasure Island* began, a brave boy who finds himself among pirates, and of the sinister pirate-cook Long John Silver holds children as entranced today as it did a century ago. It has appeared with illustrations by many leading artists, but none so apt as Peake's--first published in 1949 and out of print until now.
